Dear Colleague

WPD have drafted a modification request giving details of a proposed revision to its Use of System Charging Methodology for HV and LV connected embedded generators. Prior to submitting this change proposal to Ofgem WPD is consulting with interested parties on of the proposed changes. Details of the proposal are included in the attached Modification proposal WPD/WALES/UOS006.

WPD would be particularly interested to receive responses to the questions below and views on any other aspects of the change proposal.

Question 1 Licence Objectives:

Does the revised methodology better meet the Licence objectives as set out in Para 1.1.

Question 2

Is the treatment of Profile 5 to 8 sites appropriate (Para 5.1).

Question 3

Is the use of the £/kVA scaling the better option?

Question 4

Is the method of allocation of generators to the different charging categories appropriate?

Question 5

The implementation date for the proposal is 1<sup>st</sup> April 2009. Does this change merit an implementation date other than 1<sup>st</sup> October or 1<sup>st</sup> April?

Please send your responses to [wpdpricing@westernpower.co.uk](mailto:wpdpricing@westernpower.co.uk). The closing date for this consultation is Wednesday 3<sup>rd</sup> June 2008.

Yours sincerely

Nigel Turvey  
Design & Development Manager
