

G83/2 SSEG INSTALLATION COMMISSIONING CONFIRMATION

In accordance with ESQCR and HSE Certificate of Exemption (2008) the Installer is required to advise the DNO of the intention to use the SSEG in parallel with the network no later than 28 days (inclusive of the day of commissioning), after commissioning the SSEG

Please forward this form to Western Power Distribution at the appropriate address below, ensuring you have quoted the WPD Enquiry reference number if this has already been given to you.

For South Wales & South West England

SSEG Details

Note only technologies with Type Tested equipment can be installed under G83/2.

Capacities	phase 1 in kW	phase 2 in kW	phase 3 in kW	Type test ref only for new installations	Primary energy source. e.g. Wind, Solar PV, Hydro, Gas CHP.
New/Existing					

The Maximum aggregate capacity of SSEGs installed in a single customer's installation under G83/2 is 3.68kW per phase at 230V AC.

Identify above new SSEG installations and existing installations at the site which have not been de-commissioned as of the date of this declaration. Use a separate line for new and existing installations and for different Primary Energy sources above. For installations above 3.68kW per phase the separate G59 process applies and the DNO needs to be consulted before any installation is undertaken. Use ph 1 column for single phase supply

I confirm that the new SSEGs noted above has/have been installed and commissioned to comply with the requirements of G83/2 as required by The Distribution Code. I enclose a copy of the circuit diagram which has been left on site at the customers incoming meter location.
