1 Foreword

The main activity of Western Power Distribution (West Midlands) plc ("WPD West Midlands" or the "Company") is the distribution of electricity within its service area of the West Midlands region of England. It is one of twelve licensed distribution network operators ("DNOs") within England and Wales.

Each DNO is a natural monopoly regulated by the Gas and Electricity Markets Authority (known as "Ofgem"). It is therefore subject to control on the prices it can charge. The principal legislation governing the structure of the electricity industry in Great Britain is the Electricity Act 1989, as amended by the Utilities Act 2000 and the Energy Act 2004. This legislation provides for a licence framework in which the operations of the DNOs are regulated, pursuant to which income generated is subject to an allowed revenue regulatory framework that provides economic incentives to minimise operating, capital and financing costs consistent with the DNOs providing an acceptably reliable distribution network and meeting their legal responsibilities. This licence framework is overseen by Ofgem.

Licences which govern DNOs require each DNO to produce regulatory accounts. These comprise two documents:

- Regulatory Financial Statements; and
- Regulatory Reporting Pack ("RRP").

The purpose of the Regulatory Financial Statements is to provide financial information on the same basis as that under the normal financial policies of the DNO. The financial statements themselves are in a similar format to a company's statutory accounts prepared under the Companies Act. This document contains these audited Regulatory Financial Statements.

The RRP is designed to monitor performance against assumptions used in the latest price review, and better inform future price reviews. The level of detail should highlight the cost drivers within a DNO and thus ensure that the regulated allowance fairly reflects this.

2 Strategic Report for the year to 31 March 2018

Business model

What we do

WPD West Midlands is an electricity Distribution Network Operator ("DNO") and distributes electricity to approximately 2.5 million end users over an area of 13,300 square kilometres in the West Midlands of England. What we do is simple and comprises four key tasks:

- we operate our network assets effectively to 'keep the lights on';
- we maintain our assets so that they are in a condition to remain reliable;
- we fix our assets if they get damaged or if they are faulty;
- we upgrade the existing networks or build new ones to provide additional electricity supplies or capacity to our customers.

The 2.5 million end users are registered with licensed electricity suppliers, who in turn pay WPD West Midlands for distributing electricity across our network. Our charges are regulated and make up around 16% of a domestic customer's bill.

WPD West Midlands' network comprises approximately 23,385 km of overhead lines, 41,363 km of underground cable and 50,172 transformers.

During 2017/18, the maximum demand recorded was 4,781 megawatts (2016/17: 4,549 megawatts).

Group structure

Western Power Distribution plc is the parent of a group ("WPD Group" or "WPD") whose principal activity is undertaken by WPD West Midlands, Western Power Distribution (East Midlands) plc ("WPD East Midlands"), Western Power Distribution (South West) plc ("WPD South West") and Western Power Distribution (South Wales) plc ("WPD South Wales"). Where appropriate they share engineering control and other systems.

Regulation

WPD West Midlands is a monopoly regulated by the Gas and Electricity Markets Authority (known as "Ofgem"). The regulatory framework is based on a recently updated approach for sustainable network regulation, known as the "RIIO" model where Revenues=Incentives+Innovation+Outputs. From 1 April 2015 Ofgem set an eight year electricity price control review, known as ED1. Under the RIIO model there is a much greater emphasis on companies playing a full role in developing a more sustainable energy sector and delivering value for money network services for customers. A key feature of the RIIO model is that the setting of outputs that network companies are expected to deliver is much more extensive with the outputs embedded within an overall Business Plan which acts as a "contract" between the distribution network companies and their customers. For ED1 Ofgem set WPD's allowance for the cost of equity at 6.4 per cent, which contributes to a weighted average cost of capital ("WACC") allowance of 3.68 per cent for 2017/18.

The operations are regulated under the distribution licence which sets the outputs that WPD needs to deliver for its customers and the associated revenues it is allowed to generate for the eight-year period from 1 April 2015 to 31 March 2023.

In addition to the base level of revenue which WPD West Midlands is allowed to earn, there are incentives to innovate, to achieve customer services outputs relating to customer satisfaction, complaints handling, stakeholder engagement, connections and supply interruptions, and network output measures, which may result in revenue penalties or rewards.

2 Strategic Report for the year to 31 March 2018

Business model (continued)

Regulation (continued)

WPD submitted an outputs based Business Plan for the RIIO-ED1 period 2015-2023, which was accepted by Ofgem as “well justified” and could therefore “fast-track” all four WPD licensed areas, ahead of the other five licensed distributor groups. WPD’s modified licences took effect from 1 April 2015.

Business objectives

WPD's business objectives are simple. They are:

- to minimise the safety risks associated with WPD's distribution network;
- to improve the reliability of electricity supplies and to make the distribution network more resilient;
- to reduce WPD's impact on the environment and to facilitate low carbon technology;
- to consistently deliver outstanding customer service;
- to meet the needs of vulnerable customers;
- to engage with our stakeholders;
- to be efficient, effective and innovative in everything we do;
- to make a return for the shareholder.

In summary the main objective of the business is to deliver frontier levels of performance at an efficient level of cost.

Long term strategy

WPD's long term strategy is to deliver our business objectives through an efficient and scalable organisational structure that can evolve to accommodate the challenges of the future.

Efficient organisational structure

The current flat organisational structure with locally based teams of in-sourced labour has been the foundation of WPD's success. It gives responsibility to front line staff to deliver work programmes and the absence of multiple layers of management minimises costs.

There are no plans to change this successful business model.

One of the big advantages of the geographical team structure is scalability. More staff can be added to an individual team where increases in future work cluster together or additional teams can be created where there are more widespread increases in workload. These changes can be achieved quickly.

Self-sufficiency

WPD's resourcing strategy is to use in-sourced labour. This ensures that knowledge is retained, allows greater flexibility to redeploy staff where needed and builds a strong culture with staff motivated to deliver business objectives.

The development of in-house apprentice schemes, training facilities, technical knowledge, operational capability and bespoke systems increases the self-sufficiency. This allows the business to respond quickly to new requirements and obligations and have better control over succession planning.

Investment in technology and innovation

Developing better ways of doing things is encouraged throughout the business. Innovative ideas are captured, tested and rolled-out into the business on a regular basis.

2 Strategic Report for the year to 31 March 2018

Long term strategy (continued)

Investment in technology and innovation (continued)

Innovation is core to our business strategy. We published an updated Innovation Strategy on working smarter and more cost effectively. We look for innovative developments across five broad areas:

- Network performance and efficiency – searching out better processes, equipment and technology that ensure we continue to be efficient;
- Low carbon networks – supporting future electricity demand and generation requirements;
- Smart grids and meters – developing new techniques and utilising enhanced data to help develop more dynamic network control;
- Environment – reducing our business impact on the environment;
- Customer service – developing smarter ways of delivering better customer service.

Technology can provide benefits of improved performance or efficiency. The deployment of technologies is carried out in a way to ensure that compatibility is maintained. This applies equally to IT equipment, communications infrastructure and the roll out of new innovative network management techniques. This keeps costs low as fewer interfaces are required.

Understanding the long term needs of the network

Network monitoring, independent information sources and modelling techniques are used to predict investment requirements into the long term.

Asset replacement forecasts show that in the future more investment will be required to replace an ageing cable population. Monitoring of fault rates and analysis of causes will enable targeted investment programmes to be established. An example of practice where this already exists is in the replacement of Consac cables that were installed in the 1970s but have since been found to have a greater than average fault rate.

In July 2017, as part of its Industrial Strategy, the Department for Business, Energy and Industrial Strategy ("BEIS") published its Smart Systems and Flexibility Plan jointly with Ofgem. New technology is changing the way we generate, distribute and consume energy, and information and communication technology will transform local energy networks from passive systems to more active smarter networks. We are working to accommodate substantial increases in low carbon technologies by providing nationally-adopted innovative solutions that enable generators to connect to our network more quickly and at reduced cost. Alongside this we are exploring the flexibility available from both power generation and demand as we develop as a Distribution System Operator ("DSO"). In July 2017 we issued a consultation on our proposed DSO Strategy. Through implementation of our DSO Transition Programme, we plan to build on our Future Networks Programme and invest £125 million up to 2023 to ensure that our network, and our business, has the capacity to deliver all the emerging system requirements our customers have, both now and in the future.

Doing more than the legal minimum

As a minimum the activities carried out aim to comply with licence obligations and the Electricity Act. Where identified as being in line with our business objectives, additional activities will be carried out to provide better service or provide additional network capacity. This approach ensures that any incremental investment above legal requirement is made to bring about clearly identified benefits to our customers, stakeholders and our business.

2 Strategic Report for the year to 31 March 2018

Long term strategy (continued)

Completing work programmes

WPD does not delay work programmes. Whilst short term savings would provide a financial benefit under the regulatory efficiency incentive ("IQI"), such action is not commensurate with providing a longer term reliable network for customers. Unless objectives change, work programmes are completed.

Adapting the network for climate change

We engage with the BEIS and the industry to identify common climate change impacts and set about implementing changes to ensure that our networks remain reliable into the long term future.

We have used available projected climate data to assess risks resulting from three priority areas - increased lightning activity, flooding and the impact of temperature rise on overhead lines.

Lightning activity is predicted to increase across the whole WPD area. The effects are being mitigated by adding lightning protection devices to the network.

Site specific flood risk assessments are used to identify the most prudent flood prevention method to adopt to protect equipment. Mitigation measures include protection of individual items, protection of buildings and protection of the site as a whole or in extreme cases site relocation.

Predicted increases in ambient temperature not only mean that thermal expansion will affect overhead line clearances but also thermal loading limits will be reached more quickly. As a result, we have introduced new overhead design requirements to increase ground clearance and have prepared new conductor ratings for overhead lines.

Stakeholder engagement

WPD regularly engages with stakeholders to ensure that our business objectives and strategy are in line with their needs and so that we can learn from our customers first hand. True improvements in customer service and business delivery come from understanding the areas where we can do better.

We use a range of engagement methods, including:

- stakeholder workshops;
- customer panel meetings;
- focus groups with domestic customers;
- 'willingness to pay stated preference' interviews with domestic and business customers;
- connections and distributed generation surgeries;
- distributed generation customer interviews.

Following stakeholder workshops we publish reports detailing all of the feedback received, as well as a WPD response outlining the conclusions we have reached and how this will impact on our plans.

2 Strategic Report for the year to 31 March 2018

Business review

The focus for the business during the year has been to continue to concentrate on the key five goals of safety, network performance, customer service, environment and business efficiency.

Key performance indicators ("KPIs") (continued)

	2017/18	2016/17	2015/16
Non-Financial			
Safety:			
Lost time accidents	0	2	2
Non lost time accidents	19	22	21
Network reliability:			
Customer minutes lost	22.5	32	32.2
Customer interruptions (per 100 customers)	47.4	59	65.4
Financial			
Total expenditure*	£484.3m	£486.0m	£490.4m
Debt to Regulatory Asset Value ("RAV")**	63.2%	63.5%	62.7%
Interest cover***	4.6	5.0	4.2

* Operating expenses plus capital expenditure (not including customer contributions) on both tangible and intangible assets.

** RAV is a regulatory concept to represent assets with a long term life. The regulated income in any year includes a return on RAV and amortisation of RAV as determined by Ofgem during a rate review. The percentage for the prior year has been restated to reflect the nominal value of RAV.

*** Interest cover is calculated as profit before interest, taxation, depreciation and amortisation divided by interest payable.

The following table details the figures used in the Debt to Regulatory Asset Value:

	2017/18	2016/17
	£m	£m
Cash at bank and in hand	6.9	11.5
Less restricted cash	(6.4)	(3.2)
Bank loans and overdrafts	(19.0)	-
Long term borrowings	(1,434.9)	(1,433.4)
Amounts owed to other WPD	(41.4)	(9.8)
Net	(1,494.8)	(1,434.9)
RAV*	2,365.1	2,261.1
Debt to RAV	63.2%	63.5%

*It is not possible to perform a reconciliation between RAV and IFRS measures as RAV is a regulatory measure. The differences between IFRS and regulatory rules have built up over many years and cannot be reconciled.

Each of the five key goals are discussed in more detail in the following sections.

2 Strategic Report for the year to 31 March 2018

Business review (continued)

Safety

The safety of our staff, customers and members of the public continues to be a core value at the heart of all our business operations. Maintaining a practical and pragmatic safety culture from the "top down" remains an imperative. WPD staff continue to play an active role in many national committees and steering groups which concentrate on the future of safety and training policies across the industry.

There were no members of staff involved in lost time accidents in WPD West Midlands during 2017/18 compared with two in 2016/17. The number of staff involved in non-lost time accidents was 19 in 2017/18 compared with 22 in 2016/17.

The total number of accidents to staff across WPD as a whole decreased from 62 in 2016/17 to 58 in 2017/18.

During 2017/18 the Safety Team actively supported WPD Team Managers and Distribution Managers with their safety responsibilities and provided assistance to enable them to maintain a clear focus on safety. The Safety Team also continued to provide support to all other areas of the business but with particular focus on the following areas of work:

- Continued roll-out of a bespoke safety training programme to technical staff across all Network Service areas of the business to promote heightened awareness of risk assessment and safety management related issues.
- Development and introduction of a new computer based process to assist with the required checks and allow Examining Officers and Issuing Officers to create and approve authorisation certificates electronically.
- Developed further engagement with organisations that work with WPD to achieve safety, with a new programme of Safety Conferences for contractors to encourage sharing of best practice with regard to safe methods of working and to promote the industry Powering Improvement initiative.
- Work continued to extend and improve WPD applications on the iPad to assist staff with the provision of additional information and to provide enhancements to the electronic risk assessment facility.
- Support of the national joint initiative between the ENA, HSE and Trades Union bodies under the title of 'Powering Improvement' with the 2017 theme being 'Asset Management'. In particular by co-ordinating a number of presentations to discuss relevant scenarios and to avoid the loss of corporate memory.
- A targeted public safety leaflet campaign, to provide information about keeping safe in proximity to WPD assets, to over 120,000 wayleave grantors and organisations that operate mobile plant such as lorry loaders and cranes within WPD regions.

During the Autumn of 2017 the Safety Team provided a package of presentations to support managers throughout WPD as part of the '2017 WPD Safety Week' programme, to update staff on the company's health and safety statistics and provisions to cater for mental health issues, to raise awareness of the precautions required where work has to be carried out on live electrical apparatus, how to avoid a slip, trip or fall which is the most frequently reported type of accident within the business, and safe driving techniques.

In May 2017 an internal audit confirmed that the combined Safety Management Systems conform to OHSAS 18001:2007 as issued by the British Assessment Bureau.

2 Strategic Report for the year to 31 March 2018

Business review (continued)

Network performance

Performance of the distribution network is measured in two key ways:

Security - the number of supply interruptions recorded per 100 connected customers ("CI"); and

Availability - the number of customer minutes lost per connected customer ("CML").

All licensees who operate a distribution system are required to report annually to Ofgem on their performance in maintaining system Security and Availability. The Quality of Service incentive scheme, also known as the Information and Incentives Scheme ("IIS") which was introduced by Ofgem in April 2002, financially incentivises all licensees including WPD with respect to both the Security and Availability of supply delivered to customers. In addition Ofgem incentivises the quality of telephone response customers receive when they contact the licensee. This is assessed by a customer survey carried out on a monthly basis.

Network performance reported to Ofgem for the year was as follows:

	<u>Total</u>	<u>Target of less than</u>
Minutes lost per customer 2017/18	31.0	
Excluded event	(8.5)	
IIS Performance 2017/18*	22.5	53.0
IIS Performance 2016/17	32.0	53.6
Interruptions per 100 customers 2017/18	55.6	
Excluded event	(8.2)	
IIS Performance 2017/18*	47.4	85.4
IIS Performance 2016/17	59.0	87.1

* Subject to Ofgem confirmation of excluded events.

The figures above cover all reportable interruptions longer than three minutes in duration occurring on the WPD West Midlands network including those caused by bad weather and other faults together with 50% of CI and CML due to pre-arranged shutdowns for maintenance and construction. The 11kV network is the principal driver of customer minutes lost, with faults on overhead lines being the major contributor. In addition to the performance reported under IIS above, 90.67% of customers off supply in the West Midlands area as the result of a high voltage ("HV") fault were restored within one hour of the fault occurring.

Under the IIS scheme, performance is targeted at an underlying level of improvement. DNOs are thus permitted to claim an adjustment for events during the year which they believe were exceptional and had a significant impact on the total reported performance. An exceptional event can either be caused by a large number of weather related faults or be due to a one-off event which is outside the DNO's control. In either case, the event must meet prescribed thresholds in terms of the numbers of faults experienced or, for a one-off event, in terms of either the number of customers affected or the duration of the incident. If an event meets these prescribed thresholds, the DNO must notify Ofgem who will conduct an audit to determine the impact of the event. As part of the audit process the DNO must demonstrate that it mitigated against the impact of the event to the best of its ability before Ofgem will exclude the CI and CML incurred. WPD West Midlands reported four exceptional events to Ofgem during the year.

2 Strategic Report for the year to 31 March 2018

Business review (continued)

Network performance (continued)

Subject to Ofgem confirmation, our IIS CML and CI of 22.5 customer minutes lost and 47.4 interruptions per 100 customers for the year are within our targets of 53.0 and 85.4 respectively. The outperformance relative to the RIIO-ED1 targets set by Ofgem is particularly gratifying as the new targets are particularly tough for a DNO whose operational performance during this period is acknowledged by Ofgem as being a frontier performer.

Customer service

We are committed to providing excellent customer service at all times and strongly believe that customer satisfaction is the key to the future success of the business. When dealing with customers our policy is to get it right “first time, every time”. On the occasions when we fail to meet this standard, staff are encouraged to take personal responsibility for customer issues, to follow the problem through to the end, and to adopt our golden rule – “treat customers the way that we would like to be treated”.

If customers are not happy with our efforts to resolve their complaint, they are able to ask The Energy Ombudsman (“Ombudsman”) to review the matter. WPD South West and WPD South Wales have completed a ninth year of the statutory Energy Ombudsman Scheme with zero customer complaints upheld. WPD West Midlands and WPD East Midlands achieved a sixth year of the statutory Energy Ombudsman Scheme with zero customer complaints upheld.

During the year WPD West Midlands recorded 20 failures against Ofgem’s national Customer Guarantee Service Standards for network performance. The Company also recorded zero failures for the year relating to connections performance.

Stakeholder Engagement

WPD has maintained its position as the top performing DNO group in the Stakeholder Engagement Incentive Award Scheme (which is a key element of Ofgem's Broad Measure of Customer Satisfaction), held since its introduction in 2011/12. Most recently for the year 2016/17, WPD was again rated in first place with a score of 8.53 out of 10. This is worth £6.17m (16/17 prices) and will be applied to 2018/19 revenues across the four DNOs. WPD entered three written submissions, hosted a one day audit of the Consumer Vulnerability part of the submission, which was then followed by a question and answer session with an Ofgem-appointed judging panel of experts.

Broad Measure of Customer Satisfaction

WPD continues to perform well against Ofgem’s Broad Measure of Customer Satisfaction Incentive. A research agency undertakes a monthly satisfaction survey of DNO customers who contact their DNO to report loss of supply, been notified of a planned interruption, have a general enquiry, or request a new connection (quoted and have completed). For the ED1 period DNOs are scored across the six performance areas. For WPD’s four licence areas around 22,000 customers are surveyed per year. For the regulatory year 2017/18, WPD has been rated the number one DNO for customer satisfaction for the seventh consecutive year with an overall satisfaction rating of 8.93 out of ten.

Ofgem also compares the speed of response that a DNO call centre provides and WPD is consistently identified as the top performer with an average speed of response below 1.65 seconds.

2 Strategic Report for the year to 31 March 2018

Business review (continued)

Customer service (continued)

National Customer Service Excellence Standard

WPD's leading customer service is demonstrated by its accreditation to the national Customer Service Excellence Standard ("CSE").

WPD has held the charter mark of best practice since 1992 - the only energy company in the UK to do so. The CSE assessor visits a number of locations across WPD every year. WPD undergoes a stringent external assessment of our engagement activities every year. The CSE standard seeks to ensure we are providing services that are efficient, effective, equitable and have the customer at the heart of everything we do. There is a strong focus on the quality of our engagement methods and in particular the steps we take to develop customer insight, understand users' experiences, robustly capture their feedback and measure satisfaction. The standard assesses WPD's delivery, timeliness, information, professionalism and staff attitudes.

WPD is assessed against 57 elements and has full compliance against every one. As an established holder of the charter mark, WPD is assessed as part of a three year rolling programme, where one third of the standards are reviewed annually. There are four potential outcomes ranging from 'non-compliance' to 'compliance plus' (the highest level possible, indicating best practice across all sectors).

WPD was reassessed in March 2018. WPD was successfully reaccredited, and demonstrated that improvements continue to be made with compliance plus ratings for a record 43 elements, with zero partial or non-compliances. The assessor concluded that "the culture of WPD continues to be highly customer-focused with a strong emphasis on team working and the use of customer insight to improve service delivery. There is strong leadership and appropriate policies and procedures to support staff in delivering consistently high levels of performance".

British Standard for inclusive service provision

In 2014, WPD became the first company in the UK to be externally assessed by the British Standards Institute as fully compliant with the BS18477:2010 British Standard for inclusive service provision. Following a full system audit in December 2017, we retained full compliance with this standard for a fifth year. BS18477 was recommended by Ofgem as part of its Vulnerable Customer Strategy review discussions. The assessment adds considerable endorsement to WPD's social obligations programme and the services we offer to our Priority Service Register customers. WPD was assessed during a two day audit to review the accessibility of our services, literature and website, as well as WPD's social obligations programme and vulnerable customer strategy, all associated systems and processes, Contact Centre operations and the new connections process. WPD was assessed as fully compliant in over 36 audit elements.

In December 2017 the auditor reported that "WPD is achieving positive outcomes for its customers through expanding its PSR referral networks, implementing new innovative fuel poverty projects and using partners in the health and education sectors to target 'hard to reach' customers."

Customer Panel and Stakeholder Workshops

The WPD Customer Panel was introduced in 2011. The panel meets four times a year and members, who represent a wide range of customers and other key stakeholder groups, help us keep up to speed with the issues affecting our customers.

2 Strategic Report for the year to 31 March 2018

Business review (continued)

Customer service (continued)

Customer Panel and Stakeholder Workshops (continued)

Members include representatives from Citizen's Advice, the British Red Cross, Major Energy Users Council, local parish councils, B&Q, University of Nottingham, Energy Saving Trust, Severn Trent Water and National Grid. Through the Panel, we proactively seek honest and challenging customer views about the way we operate and our future plans. It plays an important role in helping WPD develop its strategic priorities. The Panel is attended by WPD's Chief Executive and other directors, demonstrating the commitment at every level to proactively engage with customers.

Since 2010 WPD has held a number of stakeholder workshops and over 5,000 people, across a range of organisations, have been engaged to help us build and review our Business Plan - the vast majority face-to-face. Now that WPD's Business Plan has been agreed, WPD has maintained its relationship with stakeholders and shifted the focus on to delivery and also identifying long-term strategic priorities that may change the way networks operate in the future.

In January 2018 WPD hosted annual stakeholder workshops in Birmingham, Derby, Cheltenham, Newport, Bristol and Plymouth. The six events were attended by 270 stakeholders from a range of different backgrounds including domestic, business, local authorities, developers/connections, environmental, energy/utility, regulatory/government and voluntary sectors. WPD has subsequently identified 13 key improvement actions that WPD will be taking in order to address the stakeholder feedback received.

Deaf Awareness Chartermark

WPD holds the Action on Hearing Loss (formerly RNID) 'Louder Than Words' charter mark accreditation, which assesses and endorses the accessibility of WPD's services for deaf and hard of hearing people. We have held the accreditation for seven and nine years respectively for WPD South Wales/WPD South West and WPD East Midlands/WPD West Midlands. We are the first DNO in the UK to have launched the "InterpreterNow" service. This enables deaf customers to contact us in British Sign Language ("BSL") via an online interpreter by downloading a free app. In addition, we now provide a series of customer information videos in BSL.

Environment

WPD is committed to conducting its business as a responsible steward of the environment. WPD plans new routes so as to minimise, as far as economically possible, their impact on the environment.

Every member of staff is made aware of WPD's environmental commitment to abide by environmental laws, regulations and corporate environmental policies, and their responsibilities for reporting any concerns on potential environmental compliance issues so that appropriate action can be taken.

Following a successful surveillance audit in March 2018, WPD maintained certification to ISO55001. This international standard for Asset Management is the successor to PAS55, against which WPD held continuous accreditation since 2006. Whilst asset management specifications, both PAS55 and ISO55001 encompass risk management, setting of and adherence to policies and procedures, and thus has relevance to control of environmental risk.

Fluid filled cables

The design of very high voltage underground cables has evolved over many years and our new cables all use a solid plastic like insulation. Old designs of 33kV and higher voltage cables used an insulating oil in ducts inside the cable. Whilst these cables are normally very reliable, in the event of a fault, or commonly damage by third parties digging the street, this oil may leak out, sometimes many hundreds of litres.

2 Strategic Report for the year to 31 March 2018

Business review (continued)

Environment (continued)

Fluid filled cables (continued)

In common with other DNOs, WPD works to an operating code agreed with the Environment Agency, and assesses both the condition and the environmental risk posed by the fluid filled cables which WPD owns. The losses from WPD's fluid filled cables can vary from year to year dependent on the number of small leaks at disparate locations rather than high volume single events, often caused by third parties.

	Fluid losses (litres)
	WPD Group
2017/18	33,227
2016/17	17,251
2015/16	19,580
2014/15	25,131
2013/14	16,061

The use of Perfluorocarbon Trace ("PFT") technology within WPD reduces the effect on the total annual fluid losses. WPD continues to provide the Environment Agency with a monthly leak report as required under the joint agreement between the Environment Agency and Energy Networks Association ("ENA") Fluid Filled Cables Group.

SF6 gas

Sulphur hexafluoride (SF6) is a man-made gas which has had widespread use such as in double glazing, tennis balls and training shoes as well as a number of industrial applications including high voltage switchgear. Unfortunately it is also a strong greenhouse gas, with a global warming potential 22,800 times greater than carbon dioxide (CO2).

WPD carefully monitors its SF6 equipment and employs the external ENA Engineering Recommendation S38 methodology for the reporting of SF6 banks, emissions and recoveries. That ENA document, initially drafted by WPD, employs approaches set out by The Intergovernmental Panel on Climate Change ("IPCC"), set up by the World Meteorological Organisation and the United Nations Environmental Programme.

The losses from both WPD East Midlands and WPD West Midlands from SF6 equipment in 2017/18 amounted to 244kg, representing less than 0.5% of its bank.

WPD has been listed in the Fluorinated Greenhouse Gas Regulations 2015 (amended) as a Recognised Certification and Evaluation Body (HV Switchgear) under Regulation 33, and has now certified relevant WPD staff.

Electric and magnetic fields ("EMFs")

The question of whether electric and magnetic fields are linked in any way to ill health is a long standing one which has no conclusive answer. WPD is committed to providing members of the public and its employees with full and up to date information on the issue. We believe that the decision on what constitutes a safe level of exposure should be made by the UK Government, advised by the Health Protection Agency.

WPD complies with the public exposure recommendations contained within the 1989 ICNIRP (International Commission on Non-ionising Radiation Protection) Guidelines on Extremely Low Frequency Electromagnetic Fields and with the occupational exposure requirements specified within the Control of Electromagnetic Fields of Work Regulations 2016.

2 Strategic Report for the year to 31 March 2018

Business review (continued)

Environment (continued)

Electric and magnetic fields ("EMFs") (continued)

In addition WPD follows the ENA Recommendation G92/1, Guidelines for best practice in relation to Electric and Magnetic Fields ("EMFs") in the Design and Management of Low Voltage Distribution Network and the Department of Energy and Climate Change (now BEIS) Code of Practice on the Optimal Phasing of High Voltage Double Circuit Power.

General

In May 2017 all four of our licensed areas gained certification to the new ISO14001:2015 environmental management standard with no major non-conformances being raised. One six monthly surveillance audit was undertaken in December 2017 and again no major non-conformances were raised.

As with any large organisation working at the heart of the community, WPD wants to support these communities in ways that will enhance the landscape for people and wildlife too. Supporting environmental activities at a grass-roots level enables the community to make meaningful changes which are sustainable and provides an instant impact. In our experience, local groups, charities and schools are willing to take on small scale community projects but lack the financial input for tools and resources to make it happen.

Working in partnership with various regional Wildlife Trusts, The Conservation Trust and Groundwork Wales has enabled school children to experience hands-on nature projects, develop orchards in schools and understand the positive benefits of conserving our natural habitats for the future.

Certain environmental issues are discussed in the Corporate and Social Responsibility section. There is always the risk that changes in legislation relating to environmental and other matters, including those imposed on the UK by the European Union, could result in considerable costs being incurred by the Company with no guarantee that Ofgem would allow them to be recovered through regulated income.

Business efficiency

Profit before tax decreased by £30.2m compared to the previous year. Operating profit at £302.6m was £28.8m lower with turnover down by £18.9m and operating expenses up by £9.9m. Turnover in the year was impacted by a decrease in tariffs and the timing of the recovery of regulated income.

Total expenditure ('totex') has decreased by £1.7m in comparison to the prior year. Capital expenditure has decreased by £11.6m. Totex is a key feature in the business plan submission to Ofgem as part of the price review process as it underpins the allowed revenue set; thus actual performance against the business plan is subject to close scrutiny as we are incentivised to stay within the business plan.

Total net assets at 31 March 2018 were £1,318.8m, an increase of £72.5m on the previous year. Tangible fixed assets increased by £211.5m reflecting the fact that capital expenditure far exceeds the historical cost depreciation charge. Cash and short term deposits have decreased by £4.6m. Balances due to other WPD undertakings increased by £37.1m and deferred contributions increased by £36.9m.

The Company also issued £50.0m in share capital during the year.

The pension liability increased from £25.7m to £43.8m as no employer contributions were paid during year (as prepaid in March 2017).

2 Strategic Report for the year to 31 March 2018

Business review (continued)

Business efficiency (continued)

Debt to RAV

Asset cover (total net debt to regulatory asset value) is part of the rolling credit facility covenants for several of the WPD companies and is used as a key internal measure. As part of the regulatory process, Ofgem determines what it considers an appropriate debt/equity split to optimise the cost of capital and to ensure that the volume of debt in relation to RAV does not threaten the liquidity of the licensee.

Interest cover

The ratio of earnings before interest, tax, depreciation and amortisation (EBITDA) to interest payable is part of the rolling credit facility covenants for several of the WPD companies. It is also used as a key internal measure of the financial health of the DNOs. The interest cover ratio for WPD West Midlands is at an acceptable level and shows that the Company is generating more than enough profits to cover the interest payments.

Capital investment

Gross capital investment on tangible fixed assets (before customers' contributions) during the period was £287.9m (2017: £299.1m) across the WPD West Midlands region and included the replacement of overhead lines and switchgear together with the introduction of new technology.

A number of significant projects were undertaken during the year including:

- *Birmingham city centre*

The West Midlands Projects' team has commissioned two new 6km 132kV XLPE cables between Nechells East and Bordesley 132kV substations in Birmingham. These replaced two nitrogen gas filled cables which were installed in 1970 and had recently failed. The new route runs for 6km through Birmingham city over challenging obstacles such as tunnels, bridges, historic redundant architecture and river culverts from Nechells East to Bordesley substation. The work was completed on 26th November at a cost £8.1m.

- *66kV connection to wind turbine*

A 66kV connection to a 17 wind turbine site at Garreg Llwd near Felindre in South Wales has been completed in 2017. Although the site is in South Wales, due to the remote location, the nearest connection point to the network was from the West Midlands' network which is over 20km away. The project was delivered by the Ludlow area teams, West Midlands' Projects team and Primary System Design and involved the replacement of two 66kV transformers at Presteigne and Knighton, the laying of 19.5km of 66kV cable and the building of 4.5km of 66kV overhead line. This major project was particularly challenging due to the circuit route being over 20km in the highway and across landowner's property.

- *London to Birmingham High Speed rail link*

HS2 Phase 1 which is the High Speed railway link between London and Birmingham has started with 396 sites across East and West Midlands requiring WPD assets to be diverted. A small internal team has been set-up in the West Midlands to co-ordinate the works with HS2's project team. The works range from simple low voltage diversions to the relocation of major 132kV substations and tower lines. WPD has concluded negotiations with HS2 on a Design and Construction Agreement and now has work orders to initiate the major diversion works as well as requests to provide new connections to HS2's tunnel boring machines used along the route. The HS2 Phase 1 project is due to be completed in 2027.

Future developments

See page 3 for details of our long term strategy.

2 Strategic Report for the year to 31 March 2018

Future developments (continued)

RIIO-ED1

All four WPD DNOs were fast-tracked by Ofgem in respect of RIIO-ED1, the only DNOs selected for this process. Fast tracking affords several benefits, including the ability to collect additional revenue equivalent to 2.5% of total annual expenditures (approximately £25m per year across WPD), greater revenue certainty and a higher level of cost saving retention.

In June 2015 Ofgem published a consultation proposing a new form of accounts which will apply to the network operators ("NWOs") that are regulated under the RIIO framework. The proposed RIIO accounts will replace Regulatory accounts. The aim is to improve transparency and make it easier for stakeholders to interpret the regulatory position and performance of the NWOs. Ofgem continues to work with NWOs, External Auditors and stakeholders to develop the RIIO Accounts including the Regulatory Financial Reporting Standard ("RFRS"), which set out the rules and procedures by which the accounts should be prepared.

In March 2018 WPD published "RIIO accounts" for the 2016/17 year on a voluntary basis and is seeking stakeholder comments and feedback on the format and content of the report to help shape future editions. The aim of the RIIO accounts is to reflect regulatory performance, based on the RIIO framework. As a result, there are differences between RIIO accounts and statutory accounts.

We hope that by sending out a proposal of what the RIIO Accounts can look like this will help ongoing discussions and development of a set of accounts which is useful for a range of stakeholders. It is Ofgem's intention that 2018/19 will be the first year of RIIO accounts for all energy network companies.

Future Networks - Research, Innovation and Low Carbon Networks

As part of the previous distribution price control period (known as DPCR5), Ofgem introduced the Low Carbon Network Fund ("LCNF"). It was set up to encourage DNOs to test new technology and commercial arrangements to support the UK's low carbon transition and climate change objectives.

The RIIO ED1 innovation mechanisms came into force in 2015, introducing the Network Innovation Allowance ("NIA") and Network Innovation Competition ("NIC"). NIC has similar focus to LCNF in testing technology and commercial arrangements to support the UK's low carbon transition. NIA has a broader remit encouraging technical and commercial innovation to support all DNO activities.

LCNF projects awarded during DPCR5 continue to be delivered during RIIO-ED1. Project delivery and reporting are set out in special licence conditions and in Ofgem's LCNF, NIA and NIC governance documents.

WPD secured funding for six LCNF Tier 2 flagship projects:

- Network Templates, was completed during 2013 with significant new learning which led to technical policy changes facilitating lower energy bills for customers.
- The Lincolnshire Low Carbon Hub was completed in February 2015 and resulted in "alternative connection" arrangements being implemented for generation customers.
- Project FALCON completed in October 2015; this project gave WPD a more detailed understanding of the application of various engineering techniques, an evolving roadmap about data requirements and a number of follow on projects that build on the learning from the project. In particular this project led to the development of WPD's "Flexible Power" demand side response proposition (www.flexiblepower.co.uk).

2 Strategic Report for the year to 31 March 2018

Future developments (continued)

Future Networks - Research, Innovation and Low Carbon Networks (continued)

- The SoLa Bristol project was completed in April 2016 and provided learning linking customer profiles, time of use tariffs and charging/discharging regimes that will inform regulation and tariff changes moving forward.
- FlexDGrid – This project concluded in June 2017 and developed a much greater understanding of Network Fault Levels. Through enhanced modelling and ground breaking measurement equipment it has assisted the city of Birmingham with the implementation of CHP (combined heat and power).

The remaining LCNF project is continuing to make good progress with valuable learning emerging as WPD trial new solutions:

- Network Equilibrium – This project is investigating the issues associated with further demand and generation integration on rural networks through a better understanding of voltage profiles and power flows. Through optimising voltage profiles at a system level and balancing power flows through the innovative use of power electronics, the existing network capacity can be fully utilised allowing an increased level of distributed generation and demand to connect to the existing network more quickly and cost effectively.

WPD has secured funding under the NIC for two projects:

- Open LV – This project is led, following a tender for project partners, by EA Technology Limited. It is developing a substation intelligence platform which can make network data available to communities and academic institutions. It will also host a number of localised and autonomous Smart Grid applications, freeing capacity on local networks for low carbon technology new connections.
- Energy Forecasting and Flexibility System (EFFS) – This project is being delivered in conjunction with related projects within SSE Energy Networks (Transition) and SP Energy Networks (FUSION). Our work involves the development of a simple, repeatable and transparent methodology to forecast Demand Side Response (DSR) requirements to maintain current levels of supply security. The methodology and algorithms will be demonstrated in a prototype system to be developed by project partner AMT Sybex.

WPD completed 10 projects under the DPCR5's Tier 1 mechanism. Under the RII0-ED1 arrangements, WPD has registered 30 projects under NIA covering a broad range of topics.

Further details of innovation activities can be found at www.westernpowerinnovation.co.uk.

Principal risks and uncertainties

The Company views the following risk categories as those that are the most significant in relation to WPD.

Regulatory risk

A substantial part of the Company's revenue is regulated and is subject to review every eight years. The current price control, RII0-ED1, commenced 1 April 2015 and continues to 31 March 2023.

Under the review, Ofgem assesses the revenue and capital expenditure plans of the Company and determines what it considers an efficient level of that expenditure. Ofgem also considers the required cost of capital sufficient to encourage the required investment in the network, and determines customer service targets.

2 Strategic Report for the year to 31 March 2018

Principal risks and uncertainties (continued)

Regulatory risk (continued)

WPD's management invests considerable resource in the review process and has been proactive in working with Ofgem to establish better measures of cost recording to inform future reviews.

If the Company feels that, as a result of a review it would financially be unable to continue to operate and to meet its obligations under the licence, then it has the right to refer the matter to the UK Competition and Markets Authority for a determination.

The Company's regulated income and also the RAV are to some extent linked to the movements in RPI. Reductions in RPI would adversely impact revenues and the debt/RAV ratio.

Mid-period review

A mid-period review ("MPR") of outputs is a mechanism included in the RIIO price controls to help manage uncertainty. Any potential MPR would cover material changes to outputs that can be justified by clear changes in government policy and the introduction of new outputs that are required to meet the needs of customers and other network users. Ofgem has made it clear that an MPR is not an opportunity to re-open the price controls or alter incentive mechanisms, other than as required to accommodate changes to outputs. Ofgem has also ruled out making retrospective adjustments as part of an MPR. In February 2017, Ofgem published its final decision on the MPR for National Grid electricity transmission and gas distribution, the results of which took effect in April 2018. There was no MPR for gas distribution or for the Scottish Transmission companies.

In July 2017 Ofgem issued a call for evidence on a potential MPR for electricity distribution, followed by a full consultation in December 2017 on options including no MPR, a focused increase in scope or a significant increase in scope. Ofgem published the decision in April 2018 that it would not progress the MPR.

RIIO2 Framework

In July 2017 Ofgem launched the RIIO2 process for establishing the key principles for the RIIO2 Framework across transmission and distribution, followed by a series of industry workshops. Ofgem issued a RIIO2 Framework Consultation in March 2018. This includes topics such as the length of the ED2 price control period, the cost of equity and a more prescriptive structure for stakeholder engagement. The consultation closed on 2 May and Ofgem expects the decision to be published in Autumn 2018.

Network disruption

Disruption to the network could impact profitability both directly through the timing of recovery relating to the lower units delivered on which income is charged, and also through the system of penalties and rewards that Ofgem has in place relating to customer service levels (discussed under the 'Network performance' section).

There are economic restrictions on the level of capital expenditure that can be incurred to make the network totally reliable. A certain level of risk must be accepted and this is recognised by Ofgem in its regulatory review. However, the Company believes that its network is robust. It targets capital expenditure on schemes which are assessed to have the greatest improvement to customer service levels. It also spends considerable sums on routine maintenance, including tree cutting to keep trees away from lines both for safety reasons and as trees have been proven to be a major cause of network interruptions. The Company has met Ofgem's targets for customer service.

2 Strategic Report for the year to 31 March 2018

Principal risks and uncertainties (continued)

Reliance on suppliers

WPD relies on a limited number of suppliers for cable laying and tree cutting services, and for the supply of cables, plant and machinery. However, WPD considers that there are sufficient alternative suppliers such that, should an existing supplier be unable to continue to provide supplies, then there will be no significant long-term impact on WPD's ability to operate the network.

Most of the electricity which enters WPD's network is carried on the national grid and enters WPD's network at a limited number of grid supply points. WPD is dependent on the national grid. However, this is also an activity regulated by Ofgem and thus the risk of a major failure is considered very remote.

Environment

Certain environmental issues are discussed in the Corporate and Social Responsibility section. There is always the risk that changes in legislation relating to environmental and other matters, including those imposed on the UK by the European Union, could result in considerable costs being incurred by the Company with no guarantee that Ofgem would allow them to be recovered through regulated income.

Interest rate risk

The Company has had both short-term and long-term external debt during the year, at floating and fixed rates of interest, respectively.

Credit rate risk

WPD South West, WPD South Wales, WPD East Midlands and WPD West Midlands are required by their distribution licences to maintain investment grade ratings, which they have done. All four have the following long-term corporate credit ratings: Moody's Baa1 and Standard & Poor's A-.

Cash deposits are made with third parties with a high credit rating (not below a long-term rating of A/A2/A and a short-term rating of A1/P1/F1 by Standard & Poor's, Moody's and Fitch, respectively) and within strict limits imposed by the appropriate Board.

Creditworthiness of customers

Most of WPD's income is for the delivery of electricity to end-users and thus its customers are the suppliers to those end-users. It is a requirement that all licensed electricity distributors and suppliers become parties to the Distribution Connection and Use of System Agreement. This agreement sets out how creditworthiness will be determined and, as a result, whether the supplier needs to provide collateral. The risk of a significant bad debt is thus considered low.

Pensions

Most employees are members of a defined benefit pension scheme, which also has a considerable number of members who are either retired or have deferred benefits. There are risks associated with the financial performance of the assets within the scheme and with the estimate of the liabilities of the scheme including longevity of members. Currently, ongoing service costs and a proportion of the deficit costs are recoverable through regulated income.

The defined benefit pension schemes operated by WPD are, with very limited exception, closed to new members. A defined contribution scheme is being offered to new employees instead. As time elapses, this will reduce WPD's exposure associated with defined benefit pension plans.

2 Strategic Report for the year to 31 March 2018

Principal risks and uncertainties (continued)

UK membership of European Union ("EU")

In March 2017, the United Kingdom government formally notified the EU of its intent to withdraw from the EU, thereby commencing negotiations on the terms of the withdrawal. There remains significant uncertainty as to the ultimate outcome of the withdrawal negotiations and the related impact on the U.K. economy.

Cyber security

WPD adopts a fundamentally unique stance towards reducing the cyber security risk to the extent that, in addition to considerable resources spent on "defence in depth" cyber security controls, WPD does not permit direct connection between WPD's corporate network and the internet, nor direct cloud based services accessed from WPD's corporate network, nor bring your own device. It therefore considers that the risk of major disruption to its systems or to the electricity network is very low.

Insurance arrangements

WPD has a wholly-owned captive insurance company, Aztec Insurance Limited ("Aztec"), based in Guernsey. Depending on the nature of the risk, WPD West Midlands carries all or an element of the risk itself ("self insured") or it underwrites insurance with a combination of Aztec and external insurers. Insurance arrangements are reviewed in detail annually.

Insurance arrangements for the year ended 31 March 2018 relating to WPD's key risks were as follows:

- the distribution network is self insured;
- offices and depots including their contents and stock are self insured up to £500,000 for each claim and externally insured above that, subject to a maximum of £50.0m;
- combined liability covers employer's liability, public and product liability, and professional indemnity. The first £10,000 of each claim is self insured, Aztec covers the next part of the claim up to £1.0m per claim and £5.0m in total; claims exceeding these limits are externally insured subject to certain limits;
- on motor related claims, damage to own vehicles is self insured if not recoverable from a third party, as is the first £5,000 of each third party claim. Aztec covers the next part of the claim up to £1.0m for any claim and £2.4m in aggregate; claims exceeding these limits are externally insured subject to certain limits;
- claims relating to death or injury to employees whilst on WPD business or travelling on business are externally insured subject to various limits;
- external insurance is also in place (subject to limits) for loss of money, securities or property through dishonest acts by employees and for wrongful acts by pension scheme trustees;
- insurance in respect of directors and officers is maintained by WPD's US parent, PPL Corporation;
- external insurance is also in place (subject to limits) for cyber liability (costs for security/privacy breaches, defence costs in relation to regulatory breaches and other breaches) and is maintained by WPD's US parent, PPL Corporation.

Corporate and social responsibility

Social and community issues

In the year to March 2018, we assisted 318 separate charitable and non-charitable organisations as part of a commitment of over £265,000 – the three themes of education, safety and the environment continuing to form the bedrock of our community support.

While maintaining these core themes, we continue to tailor our support to align, where appropriate, with the feedback from our stakeholder engagement and the opinion research from our customer awareness activity.

2 Strategic Report for the year to 31 March 2018

Corporate and social responsibility

Social and community issues (continued)

In particular, we have continued to promote WPD's Priority Service Register at a range of events and roadshows, and we are also continuing to develop initiatives as part of our land safety and educational safety activity.

Highlights during the year have included:

- Over 3,200 separate educational safety sessions reached over 81,000 schoolchildren against our target of 50,000. These included school visits, crucial crew and lifeskills initiatives.
- Education sponsorships included bursary support for underprivileged students in South Wales involved with Duke of Edinburgh Awards, a British Heart Foundation initiative to provide CPR kits in Bristol schools, sponsorship of the Welsh Business Awards young entrepreneur, the children's safety initiative Countrytastic at Malvern Show and partnership at three major agricultural shows (Royal Welsh, Bath & West and Malvern) with Techniquist the educational science centre for children.
- Organised the successful re-awarding of the Action on Hearing Loss (AOHL) Charter Mark for a further 12 months – the seventh consecutive year. It recognises service excellence for those who are hard of hearing or deaf.
- Singled out for praise by AOHL in its national case study 'Working for Change' which highlights service and accessibility excellence. Also won the service excellence award from AOHL Cymru.
- Partnered Wildlife Trusts in Bath and Gloucester. In Bath, a project involving three schools and local people helped to restore the landscape to support pollinators. In Gloucester, the long-term unemployed were taught a range of woodland skills – from coppicing to making tools and benches – in a project that has now been extended to include school students who struggle with mainstream education.
- Worked with Spectacle Theatre to promote PSR in West Wales through street-theatre events, where 'live adverts' were performed by the theatre to promote WPD and the Priority Services Register. As a result, we added 90 new customers to the PSR and the initiative has also been shortlisted for an Arts, Business and Brand Identity Award at the Arts and Business Cymru Awards 2018.
- Continued our winter warmth campaign with Age Cymru to distribute thermometers to the over 65s in South Wales.
- Supported three major agricultural shows (Bath & West, Malvern, Royal Welsh) promoting farm safety messages, the 105 single emergency number and our Priority Service Register. They attracted thousands of visitors. WPD's exhibition was voted best commercial stand at the Three Counties Show, Malvern, for the third year running.
- Supported one Welsh language initiative – the Urdd (Welsh Youth Eisteddfod).

Customer awareness surveys

WPD's commitment to promoting customer awareness pre-dates any of the current regulatory or government pressures on distribution businesses to sharpen their focus on stakeholder engagement.

WPD began this process in a meaningful way in 2010 with the launch of the Power for Life initiative which is designed to raise awareness of the business and to better understand and respond to customer opinion and priorities. The 2017 campaign was WPD's eighth.

2 Strategic Report for the year to 31 March 2018

Corporate and social responsibility

Customer awareness surveys (continued)

This annual customer awareness campaign Power for Life, our eighth, was held during September/October 2017 in the lead up to the winter season. Power for Life makes contact with every customer using direct mail to homes and businesses, as well as a four-week television and radio campaign, press releases and social media.

While reinforcing who we are, what we do, and how well we do it, it also provides information and advice, and explains how we can be contacted in an emergency. Following on from the 2016 campaign, it also encouraged customers to respond so that we could ensure we had their most up-to-date contact details. Some 4,036 customers responded.

Customer opinion research is taken pre and post-campaign. An independent agency undertakes face-to-face feedback with a random sample of 2,000 people across the wider WPD territory. This is designed to test customer awareness of WPD as well as the effectiveness of the campaign in raising the Company's profile and getting across key messages. Analysis indicates that the latest pre-campaign research showed a 2% improvement in customer awareness of WPD on the previous year (58% compared with 56% in 2016).

The post-campaign results indicated that 64% of customers were aware of Western Power Distribution. Here is an excerpt from this year's independent market research survey:

“Awareness of WPD reached its highest ever for the pre-stage survey. Whilst not due to this year's campaign, this may be due to a delayed effect of previous campaigns. This research has demonstrated that awareness of WPD has increased following the campaign, a positive outcome, considering it was very high before the campaign. Furthermore, through analysis of the recall and non-recall groups in the post-campaign research it was possible to isolate the ‘campaign effect’. This demonstrated a significantly higher level of awareness of WPD amongst those who had been exposed to the campaign compared to those who had not been exposed.”

(Future Focus Research, 2017)

What is very encouraging is not only the effectiveness seen from the campaign, but actually that our pre-campaign figures in 2017 continue to rise year-on-year. This illustrates that our campaign and ongoing communications work is creating a longstanding effect in making WPD more well known to customers.

Environmental matters

See the Environment section on page 11.

Greenhouse gas emissions

Our greenhouse gas reporting year is to 31 March. Emissions for the Company came from:

	tCO ₂ e		tCO ₂ e per employee	
	2018	2017	2018	2017
Scope 1 (direct emissions)				
Operational transport	6,906	6,853	3.42	3.42
SF6 gas (see page 11)	4,263	1,185	2.11	0.59
Fuel combustion (diesel)	802	761	0.40	0.38
Buildings	19	19	0.01	0.01
	11,990	8,818	5.94	4.40

2 Strategic Report for the year to 31 March 2018

Corporate and social responsibility (continued)

Environmental matters (continued)

<u>Greenhouse gas emissions (continued)</u>	tCO₂e		tCO₂e per employee	
	2018	2017	2018	2017
Scope 2 (energy indirect emissions)				
Buildings electricity	1,602	2,461	0.79	1.23
Substation electricity	6,191	7,256	3.06	3.62
Surf Telecom	28	38	0.01	0.02
	7,821	9,755	3.86	4.87
Total scope 1 & 2	19,811	18,573	9.80	9.27
Scope 3 (other indirect emissions)				
Business transport	1,063	994	0.53	0.50
Total scope 1, 2 & 3	20,874	19,567	10.33	9.77

tCO₂e = tonnes of carbon dioxide equivalent

The Company's chosen intensity measurement is tonnes of carbon dioxide equivalent per employee.

The methodology used to calculate our emissions is based on the current guidance provided from BEIS and the Department for Environment, Food and Rural Affairs ("DEFRA") Green House Gas Reporting Requirements and the UK Government conversion factors for 2017/18 Company Reporting.

Employees

The average number of employees during the year was 2,022 (2017: 2,006). This includes a proportion of other WPD Group staff who work in part for WPD West Midlands and excludes a proportion of WPD West Midlands staff who work in part for other WPD DNOs.

WPD is committed to equality of opportunity in employment and this is reflected in its equal opportunities policy and employment practices. Employees are selected, treated, and promoted according to their abilities and merits and to the requirements of the job. Applications for employment by people with disabilities are fully considered, and in the event of members of staff becoming disabled, every effort is made to ensure that their employment with WPD continues by way of making adjustments to their role and/or working environment or through retraining arranged as appropriate. It is the policy of WPD that the training, career development and promotion of disabled persons should, as far as possible, be identical to that of other employees.

WPD places considerable value on the involvement of its employees in its affairs. Staff are kept informed of WPD's aims, objectives, performance and plans, and their effect on them as employees through monthly business updates, regular team briefings and other meetings, as well as through WPD's in-house journal. Formal meetings are held regularly between senior managers and representatives of staff and their unions to discuss matters of common interest. A series of road show presentations by the directors each year ensures that all staff are aware of, and can contribute to, WPD's corporate goals.

2 Strategic Report for the year to 31 March 2018

Corporate and social responsibility (continued)

Gender Pay Gap Report

As with all other UK employers with at least 250 employees, WPD reported on their gender pay gap which was published recently.

WPD's mean hourly gender pay gap was calculated at 9.0%; the median at 10.5% which is 7.6% below the national gender gap and 17.6% below its industry gender pay gap. Therefore, in relative terms, WPD's gender pay gap is positioned positively compared to its UK wide industry segment.

WPD places great emphasis on our diversity and inclusion programmes to attract, retain and progress female employees within the business. It is important for us to continually review our gender pay gap and diversity information and be aware of factors that may impact people related decisions. We have an established Equality and Diversity policy demonstrating the equal treatment of all existing and future employees.

Human rights issues

WPD is dedicated to conducting its business with honesty, integrity and fairness. It is committed to the highest ethical standards. In support of these principles, it is the Company's policy to observe all domestic and applicable foreign laws and regulations.

In addition to conserving the human rights of its employees, WPD also considers those in relation to customers. Two specific customer groups whose needs are targeted by the Company are vulnerable customers and those in fuel poverty.

Vulnerable customers

WPD is required to hold a Priority Services Register ("PSR") that records details about vulnerable customers so that additional support can be provided when the customer contacts WPD or when their supply is interrupted. Bespoke services are provided by understanding the special needs of the customers.

WPD has established a dedicated team of people to proactively contact vulnerable customers and check the detail held about them. This is a process that will be repeated every two years to ensure that the register remains up to date. WPD is also developing processes to share data with other service centred organisations that hold information about vulnerable customers, in line with data protection requirements. In the year to March 2018, WPD contacted 955,664 customers and successfully updated 34% of their records.

Links have been established with many organisations such as the British Red Cross to improve the understanding of the needs of vulnerable customers. These partners work with WPD to improve the services that are provided and we will continue to work with them.

Help is provided for vulnerable customers during power cuts and where possible advice is provided to enable them to be prepared should a power cut occur.

Project Inspire

Working with the charity and think tank Sustainability First, WPD sponsored 'Project Inspire' alongside Ofgem, the Department for Business Energy & Industrial Strategy (BEIS) and energy suppliers. The aim was to identify how businesses are using innovative technology to meet the current and future needs of vulnerable customers. Over 100 global organisations took part, with best practice highlighted across energy, water and financial institutions. WPD won a silver and two gold awards for our proactive PSR cleansing, vulnerability horizon scan and use of two-way text messaging respectively.

2 Strategic Report for the year to 31 March 2018

Corporate and social responsibility (continued)

Fuel poverty and energy affordability

Some customers on low incomes cannot afford to use electricity to effectively heat their properties. There is growing concern that customers will suffer as economic growth remains uncertain and austerity measures affect fuel poor customers further. Whilst WPD does not have a direct obligation to provide energy efficiency advice/support, in 2013 we introduced a social obligations strategy that is updated and reviewed by our Chief Executive annually and includes actions WPD will take to address fuel poverty by helping customers to access information and key support. In recent years we have worked with expert partners such as the Centre for Sustainable Energy, the charity National Energy Action and with the Energy Saving Trust to provide information for our customers on the causes of and solutions for fuel poverty.

WPD has been working with the Coventry Citizens' Advice Bureau ("CAB") since 2014 to deliver an innovative fuel poverty referral scheme called 'Power Up'. The project helps customers by offering income and energy efficiency advice, such as benefits and tariffs advice and energy saving schemes. The service offers free, independent, confidential and impartial advice. The project works by partner organisations such as CAB taking referrals directly from WPD (following calls proactively made to vulnerable customers as part of WPD's update of the Priority Services Register).

Building on this successful model we have replicated this project and now have four 'Power Up' referral schemes – one in each of our regions working with CAB in the Midlands, Energy Saving Trust in South Wales and the Centre for Sustainable Energy in the South West. Every customer contacted as part of WPD's PSR data cleanse is given the opportunity to be referred to a partner organisation, such as Citizens' Advice and the Centre for Sustainable Energy, for support. Based on feedback from our Customer Panel customers are offered free, independent, confidential and impartial advice on:

1. Income maximisation (e.g. benefits and debt advice)
2. Tariff switching assistance
3. Energy efficiency measures (e.g. access to local insulation schemes)
4. Boiler replacements
5. Behavioural changes (e.g. efficient use of heating systems)
6. Health & wellbeing measures

In 2017/18, these projects supported over 15,000 fuel poor customers across WPD, leading to total annual savings of over £5.3m for these customers.

In 2017 we launched a fifth referral scheme 'Power Up Health' with our partner Air Liquide, aimed specifically at oxygen dependent customers. This is being trialled in the South West, where Air Liquide supports over 9,000 customers. In the first three months we delivered total annual savings of over £25,000 through this scheme.

2 Strategic Report for the year to 31 March 2018

Corporate and social responsibility (continued)

Fuel poverty and energy affordability (continued)

We also support four Affordable Warmth schemes (one per licence area) which deliver the same six fuel poverty interventions, but they do not receive referrals from WPD. Instead we have formed partnerships with existing, fuel poverty outreach programmes who via their existing front-line services seek to identify hard-to-reach customers not already known to WPD.

By Order of the Board

RA Symons
Chief Executive Officer

19 July 2018

Western Power Distribution (West Midlands) plc
Avonbank
Feeder Road
Bristol BS2 0TB

3 Corporate Governance

The Company is required under Electricity Distribution Standard Licence Condition 44, to prepare a Corporate Governance Statement with the coverage and content of the corporate governance statement that a Quoted Company is required to prepare under the UK Corporate Governance Code ("the Code") issued under the UK Listing Authority's listing rules and interpretations on corporate governance.

As described in this Corporate Governance Report, the Company has applied a number of provisions in the Code, insofar as it considers them to be appropriate to the Company given its ownership and organisational structure. Having taken the requirements of the Code into account, the Company has concluded that full compliance with main principles A4, B2, B3, B6, B7, C1, C2, C3, D1, D2 and E2 is not appropriate. Where applicable, the Company has sought to comply with the relevant elements of these provisions.

The directors confirm that the governance framework in place is appropriate to the circumstances of the Company, and that the Company is committed to high standards of corporate governance. The framework is agreed with the Company's ultimate shareholder, PPL Corporation.

The Company is indirectly owned by one US-based corporate shareholder, PPL Corporation ("PPL" - see Section 4). The Company is thus not governed by many of the requirements of the Financial Services Authority. However, condition 44 of the Distribution Licence under which the Company operates requires it to publish a corporate governance statement.

Board of directors

At 31 March 2018, the Board of the Company comprised four executive directors and two independent non-executive directors who together reflect a wide range of experience and expertise. One of the independent directors had previously been the Resources and External Affairs Director to the Western Power Distribution Holdings Limited Group (which then comprised WPD South West and WPD South Wales) until he retired on 31 March 2004, and the other is founder and chairman of a strategic communications group.

The Board of Western Power Distribution plc ("WPD plc"), the holding company for the WPD Group, meets formally at least four times per annum. The Chairman is appointed by the Board. This Board comprises the same members as the Board of the Company, with the exception of the independent non-executive directors, plus further PPL non-executive directors. The independent non-executive directors are normally invited to attend the WPD plc Board meetings.

The Board of WPD plc has set the parameters by which the WPD plc Group is managed. These have been cascaded to all subsidiaries. The directors are fully aware of their duties under the Companies Act 2006. Each director acts in good faith in a way considered to be most likely to promote the success of the Company for the benefit of the members as a whole.

WPD plc needs to give its consent as indirect shareholder to the following:

- WPD plc Group business and strategic plans.
- establishing and setting the Terms of Reference for Sub-Committees of the Board.
- setting the financial limits of the Chief Executive and approving transactions above those limits.
- the issuance, sale or exchange of any debt or equity securities together with the approval of guarantees relating thereto.
- policies and practices to be followed in managing financial risk, including the use of derivatives and other hedging techniques.
- third party financing facilities in excess of £2m.

3 Corporate Governance (continued)

Board of directors (continued)

- the acquisition of stock in another company in excess of £2m.
- dividend payments.
- the settlement of legal disputes in excess of £1m.
- annual financial accounts and directors' report.
- material capital projects.
- internal audit operational plan.

The Board has also set out a framework of authority levels within which the executive directors may operate. In addition, the WPD plc Group's executive directors, non-executive directors and other shareholder representatives informally discuss the Company's operations on a regular basis.

Overall business performance, including that of the Company, is normally discussed at the WPD plc Board meetings.

WPD's executive directors together with senior managers at PPL receive a detailed monthly group financial report. In addition, WPD's executive directors formally report both financial and non-financial performance for all operating companies at the WPD plc Board meetings.

Annually, the directors receive a briefing note from the Company's external legal advisors which reiterates their responsibilities as directors and which emphasises any legislative changes during the past year which impacts their responsibilities as directors.

The performance of the executive directors of the Board in respect of a short-term bonus was measured through a number of goals and objectives set by the ultimate owners for the calendar year. These included:

- overall WPD profitability
- certain aspects of customer performance (as set out in Section 5)
- a discretionary element which considers safety, external affairs, compliance with Sarbanes-Oxley Act (discussed below), staff and management, IT and other items.

Board committees

Due to the nature of the ownership of the Company, there are no requirements for formal Nomination and Remuneration Committees. In particular, executive directors' remuneration has been set directly by PPL as shareholder. WPD's operations are subject to internal audit examination and the results reported to both the WPD plc Board and to PPL's Audit Committee.

The responsibility for audit is assumed by the Board as opposed to being delegated to a sub committee. As set out below, copies of all WPD Corporate Audit reports were submitted to the Corporate Audit and Business Ethics Vice President at PPL during the year.

The Executive Committee comprises the executive directors and meets on a monthly basis. Matters requiring disclosure at Board level are defined within the Company's policy document 'Standards and Management'. The Company Secretary ensures that all relevant items are disclosed.

3 Corporate Governance (continued)

Responsibilities of the directors and external auditors in respect of the accounts

The respective responsibilities of the directors and of the external auditors are set out in Sections 6.1 and 6.2 respectively of this report.

Going concern basis

The financial statements have been prepared on a going concern basis as the directors consider that the Company has sufficient financial and other resources to continue in business for the foreseeable future.

More information is given under the 'Financial risk management objectives and policies' heading of Section 4 'Directors' Report'.

In addition, the directors of the Company are obliged under condition 30.2 of its licence to prepare a certificate annually which states that there are sufficient financial resources in place that will enable the Company to carry on the distribution business for 12 months from the date of signing that certificate; this they have done. The external auditor then reviews this and report to the regulator, Ofgem.

Internal control environment

PPL Corporation has an audit committee that has oversight of the internal control environment across all PPL entities. The WPD Internal Audit Team completes a programme of internal audit work that provides independent assurance on internal controls. The WPD Internal Audit Team report to both the PPL Audit Committee and the WPD plc Board. The WPD plc Board has responsibility for internal controls across WPD entities.

PPL's Audit Committee reviews and monitors the independence of the external auditor. The responsibility to monitor the financial reporting process and statutory audit of these financial statements is assumed by the WPD plc Board. This Board comprises executive and non-executive directors who are employees of WPD's parent, PPL Corporation. The Board of WPD West Midlands also includes independent directors.

The directors of the WPD plc Board have exercised their responsibility for internal controls by establishing a system of internal controls designed to manage rather than eliminate the risk of failure to achieve business objectives. In pursuing these objectives, internal control can only provide reasonable and not absolute assurance against material misstatement or loss.

There are many cultural features in WPD that contribute directly to the success of the Company and the results that it has achieved. These include:

- good definition and communication of short-term business objectives and targets;
- commitment to achievement of objectives and targets;
- speedy decision-making;
- business environment that empowers managers;
- an uncomplicated management structure that aids the flow of information both ways through the organisation.

In order for this success to occur, the control environment is one which empowers those with direct responsibility to take decisions within a clearly defined control framework. The control mechanisms have to be sufficient to limit risk but appropriate to the Company's ability to react quickly and effectively to events, therefore enabling the Company to deliver results over a sustained period of time.

3 Corporate Governance (continued)

Internal control environment (continued)

It is important to have a clearly defined structure of control expectations. The controls start at director level and make it clear to everyone concerned how the business should be conducted (policy) and how far each person can go in conducting that business (authority levels). This information is communicated effectively to all levels of staff.

As WPD is owned by a US publicly quoted company, it is subject to the requirements of the US Sarbanes-Oxley Act of 2002 (the "Act"). There are two main components of the Act, SOX 302 and SOX 404.

Under Section 302 of this Act, senior managers affirm quarterly that disclosure controls are operating effectively and that all material information is disclosed in the financial reports.

Section 404 is an annual process which includes management's assessment of internal controls over financial reporting. The WPD Group comply with these requirements via a two stage approach.

Firstly, Group level controls which are pervasive across the Group are documented and tested. The controls cover the COSO elements of effective internal control and the 17 principles set out in the COSO 2013 integrated framework. These encompass:

- control environment
- risk assessment
- information and communication
- control activities
- monitoring.

Secondly, all the major financial processes have been documented with specific detail on the controls in place. This includes the Information Technology environment which supports the financial processes. Management monitor these controls on an ongoing basis. In addition, the controls are reviewed and tested by the Internal Audit department and any issues identified are communicated back to management and the process owners to enable improvement to the controls.

Annually, the WPD Group's compliance with the Act is also reviewed in detail by WPD's external auditor. Good controls together with appropriate documentation must be maintained. Since inception of the Act, no control failures in WPD have been identified which merited public disclosure.

Identification and evaluation of risks and control objectives

The Company's strategy is to follow an appropriate risk policy, which effectively manages exposures related to the achievement of business objectives.

Business process owners are responsible for identifying and assessing the key business risks associated with achieving the corporate objectives. Any actions required to further enhance the control environment are identified along with the person responsible for the management of the specific risk.

Periodically a review of key risks is undertaken by the Internal Audit team from which an Internal Audit operational plan is developed. The progression of this operational plan is communicated to the owners on a quarterly basis as are all key observations.

The Internal Audit and Business Controls department helps to ensure that the risk management and internal control system is consistently adopted, updated and embedded into the business processes.

3 Corporate Governance (continued)

Identification and evaluation of risks and control objectives (continued)

Individual risk assessment reports highlight the most significant risks affecting the business process, and any actions necessary to improve risk management. This information is provided to the WPD plc Board, the PPL Audit Committee, and also the external auditors.

Further comment is given in Section 2 under 'Principal risks and uncertainties'.

Auditor independence

As mentioned above, PPL is subject to the US Sarbanes-Oxley Act of 2002. This Act not only requires documentation and review of internal controls but also details how audit committees, management, and auditors carry out their respective responsibilities and interact with each other. Its purpose is to build and restore confidence in public financial reporting within the US. The Act lays out specific requirements for each of these parties as it relates to corporate responsibilities, auditor regulation and independence, and financial reporting.

As a wholly owned entity of PPL, the requirements of the Sarbanes-Oxley Act of 2002 extend to WPD. One of the main elements of the Act is concerned with registered public auditing firms being unable to undertake non-auditing services if they are performing auditing services for the group. However a public accounting firm may engage in non-audit services, including tax services, for an audit client, but only if the activity is approved in advance (pre-approved) by the audit committee of the parent company. Therefore any non-auditing services required by WPD, other than those regarded as de-minimis, are detailed to the PPL Audit Committee in advance and require their approval.

PPL has adopted a policy of tendering for its world-wide audit services at any time but no less frequently than every ten years. This is to ensure that best practice is followed in relation to corporate governance and that fees are competitive. Following a tender exercise during 2016, PPL selected Deloitte LLP to replace Ernst & Young LLP. The appointment for the regulatory accounts was effective for the year ended 31 March 2017.

Code of Ethics and Legal Compliance Statement

WPD has developed a formal "Code of Ethics" that defines the standards of personal behaviour to which individual Board members and all employees are required to subscribe. This is subject to annual revision and frequent communication to all employees.

Similarly, WPD has a "Legal Compliance Programme – Statement of Policy" which is also issued periodically to employees. This states that WPD "is dedicated to conducting its business with honesty, integrity and fairness". It also states that WPD will not tolerate retaliation against any employee who reports any illegal act by the Company or by a fellow employee. Any such reports may be made to a line manager or to a named Compliance Officer within Human Resources, and may be made anonymously.

Code of conduct on fair competition

To ensure that the Company complies with its Distribution Licence and the Competition Act 1998, WPD has issued a "Code of conduct on fair competition". This is periodically updated and reissued to all staff; a copy is given to all new employees. It also applies to agents who work for WPD.

Political donations and expenditure

WPD is a politically neutral organisation and has made no political donations during the year.

4 Directors' Report

Registered company number

The Company's registered number is 3600574.

Ownership

WPD West Midlands is an indirect, wholly-owned subsidiary of Western Power Distribution plc which is owned by PPL Corporation, an electricity utility of Allentown, Pennsylvania, US.

There were no transactions between WPD West Midlands and the ultimate owner.

Results, dividends and share capital

The profit for the year to 31 March 2018 is £187.2m (2017: £222.4m).

The Company also reports other comprehensive income, which was posted directly to capital and reserves, of £0.3m (2017: £81.6m loss). This primarily relates to benefit pension plan remeasurement, net of tax.

For the year to 31 March 2018 dividends of £165.0m were paid by the Company (2017: £90.8m).

In 2018, the Company issued £50.0m of share capital (2017: £55.0m).

Political donations and expenditure

WPD is a politically neutral organisation and, during the year, made no political donations.

Financial risk management objectives and policies

WPD does not undertake transactions in financial derivative instruments for speculative purposes.

All debt at WPD West Midlands is denominated in sterling and therefore there is no currency risk exposure.

For further details of risks in relation to treasury operations, see the "principal risks and uncertainties" section of the Strategic report.

Liquidity and going concern

On a day-to-day basis, WPD South West provides liquidity to the whole of WPD with balances with other group companies being settled periodically. It has borrowing arrangements in place with a range of third parties with high credit ratings. At 31 March 2018, WPD South West had committed borrowing facilities available in respect of which all conditions precedent had been met at that date of £245.0m maturing in July 2021, of which none was drawn. In addition, it had uncommitted facilities of £110.0m of which £15.0m can only be used for the issue of letters of credit; at 31 March 2018 no borrowings had been drawn and letters of credit of £3.8m were issued.

In addition, at 31 March 2018 the WPD Group's parent, Western Power Distribution plc, had a £210.0m committed borrowing facility that expires in January 2023 of which all conditions precedent had been met at that date; at 31 March 2018, it had drawn £141.4m against these facilities and thus had £68.6m undrawn. The drawdown was utilised to part fund the purchase of \$200m Eurobonds (issued by the Company's ultimate UK parent) at a premium of \$21m from a US based fellow subsidiary of PPL Corporation.

At 31 March 2018, WPD West Midlands had committed borrowing facilities available, in respect of which all conditions precedent had been met at that date, of £300m maturing July 2021. Under this facility WPD West Midlands has the ability to request the lenders to issue up to £80m of letters of credit in lieu of borrowing. At 31 March 2018, borrowings of £19m had been drawn against the facility and no letters of credit issued. In addition, WPD East Midlands has a similar £300m facility, against which £130m had been drawn as at 31 March 2018.

4 Directors' Report (continued)

Financial risk management objectives and policies (continued)

Liquidity and going concern (continued)

The four WPD DNOs also have access to an uncommitted facility from which any DNO can draw but which in aggregate cannot exceed £20m. No borrowings had been drawn against this facility as at 31 March 2018.

At 31 March 2018, WPD West Midlands had £1,434.9m (2017: £1,433.4m) of external debt outstanding all of which was due after more than one year. It had cash and short term deposits of £6.9m (2017: £11.5m).

The Company has net current liabilities of £143.5m (2017: £68.9m). The Company's net current liabilities will be settled with a combination of cash flows from operating activities, use of existing facilities, and issuances of long-term debt.

After consideration, the directors of the Company have concluded that the Company has sufficient resources available to enable it to continue in existence for the foreseeable future and at least for a period of 12 months from the date of signing of these Regulatory Financial Statements, and have therefore continued to adopt the going concern basis in preparing the financial statements. This consideration included the availability of facilities within the Company, the relatively stable and regulated nature of the business, the forecast long term business plan, and the anticipated ability of the Company to be able to raise additional long term debt in the future.

Dividend policy

The WPD Group is structured such that a proportion of the WPD Group's debt is issued by group companies other than WPD East Midlands, WPD West Midlands, WPD South West and WPD South Wales. Interest payments on this debt, together with other items, are funded primarily through dividend payments from WPD East Midlands, WPD West Midlands, WPD South West and WPD South Wales.

Strategic report

The following information required in the Directors' report has been included in the Strategic report:

- an indication of future developments in the business - see page 3;
- an indication of activities of the Company in the field of research and development - see page 14;
- a statement on the policy for disabled employees - see page 22;
- employee policies - see page 22;
- greenhouse gas (carbon) emissions - see pages 21-22.

Directors and their interests

The directors who served during the year and up to the date of signing the financial statements were, unless otherwise stated, as follows:

	<u>Appointed</u>
RA Symons, Chief Executive	1 April 2011
DCS Oosthuizen, Finance Director (resigned 31 March 2018)	1 April 2011
P Swift, Operations Director	1 July 2013
IR Williams, Resources and External Affairs Director (resigned 31 March 2018)	9 March 2015
IR Williams, Finance Director	1 April 2018
AJ Sleightholm, Resources and External Affairs Director	1 April 2018
WH Spence, non-executive director and Chairman, President and Chief Executive Officer PPL Corporation (resigned 31 July 2017)	16 July 2015
ME Fletcher, non-executive independent director	31 October 2011
CR Watts, non-executive independent director (deceased 3 July 2017)	1 April 2014
AJ Cardew, non-executive independent director	23 March 2017

4 Directors' Report (continued)

Directors and their interests (continued)

During and at the end of the financial year, no director was interested in any contract of significance in relation to the Company's business other than service contracts.

Insurance in respect of directors and officers is maintained by the WPD Group's ultimate parent, PPL Corporation. The insurance, which is third party qualifying indemnity insurance, is subject to the conditions set out in the Companies Acts and remains in force at the date of signing the Regulatory Financial Statements.

Corporate governance

A discussion of corporate governance in WPD is given in Section 3 to this report.

Subsequent events

There have been no significant events since the balance sheet date that require disclosure.

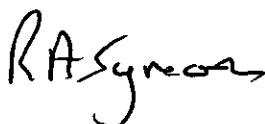

Statement of disclosure to the auditor

So far as each person who was a director at the date of approving this report is aware, there is no relevant audit information, being information needed by the auditor in connection with preparing its report, of which the auditor is unaware. Having made enquiries of fellow directors and the Company's auditor, each director has taken all the steps that he/she is obliged to take as a director in order to make himself/herself aware of any relevant audit information and to establish that the auditor is aware of that information.

Independent auditor

Deloitte LLP have expressed their willingness to continue in office and a resolution proposing their re-appointment will be put before the Annual General Meeting.

By Order of the Board

RA Symons
Chief Executive Officer

19 July 2018

Western Power Distribution (West Midlands) plc

Avonbank
Feeder Road
Bristol BS2 0TB

5 Statement on link between directors' pay and performance

Bonus payments are made annually based on a calendar year.

The executive directors' bonus arrangements includes both financial and non financial operational performance criteria. The arrangements contain a substantial incentive to maintain and improve network reliability standards, to engage with customers, and to maintain customer satisfaction.

Goals for each element of performance are determined by the owner (PPL) at the beginning of each calendar year, specifying target and maximum goals together with associated target and maximum bonus amounts. Following the end of the calendar year, results are compared with the goals, with the maximum amount paid if the maximum goals are met or exceeded; one half of the maximum if the target goals are met; or no payment if the target goals are not met.

There is also a discretionary element of the bonus which includes incentives relating to maintaining safety, enhancing communication, maintaining good employee relations and ensuring appropriate succession planning, satisfying the requirements of Sarbanes Oxley (as detailed in Section 3), and ensuring that WPD has reliable and robust IT systems.

The remainder of the bonus relates to financial performance.

In respect of the year to 31 December 2018, the Chief Executive Officer's maximum bonus in respect of network reliability, engagement with customers, and customer satisfaction is 15.2% of base salary. For the other three executive directors, it is 20.2%.

In respect of the year to 31 December 2017, the Chief Executive Officer's bonus in respect of network reliability, engagement with customers, and customer satisfaction is 8.2% of base salary. For the other three executive directors, it is 6.6%.

6.1 Directors' responsibilities statement in respect of the Regulatory Financial Statements

Each DNO is a natural monopoly regulated by Ofgem. It is therefore subject to control on the prices it can charge and the quality of supply it must provide. The principal legislation governing the structure of the electricity industry in Great Britain is the Electricity Act 1989, as amended by the Utilities Act 2000 and the Energy Act 2004. This legislation provides for a licence framework in which the operations of the DNOs are regulated, pursuant to which income generated is subject to an allowed revenue regulatory framework that provides economic incentives to minimise operating, capital and financing costs consistent with the DNOs providing an acceptably reliable distribution network and meeting their legal responsibilities. This licence framework is overseen by Ofgem.

Licences which govern DNOs require each DNO to produce regulatory accounts. One of the documents which comprise the regulatory accounts is the Regulatory Financial Statements. This document contains the Regulatory Financial Statements, which are subject to audit.

The Regulatory Financial Statements are prepared on a similar basis to financial statements which a company is required to produce. Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom accounting standards and applicable law), including Financial Reporting Standard ("FRS") 101 'Reduced Disclosure Framework'. Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that year. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors confirm that the Regulatory Financial Statements have complied with the above requirements.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

6.2 Independent auditor's report to the Gas and Electricity Markets Authority (the "Regulator") and to Western Power Distribution (West Midlands) plc (the "Company")

Opinion

We have audited the consolidated regulatory accounts of Western Power Distribution (West Midlands) plc for the year ended 31 March 2018 which comprise the profit and loss account, the statement of comprehensive income, the statement of changes in equity, the balance sheet, the statement of cash flows and the related Notes 1 to 25. These Regulatory Accounts have been prepared under the accounting policies set out therein. The financial reporting framework that has been applied in their preparation is Standard Condition 44 of the Distribution Licence ("the Regulatory Licence") and the accounting policies set out in the principal accounting policies on pages 44 to 50.

In our opinion, Western Power Distribution (West Midlands) plc regulatory accounts are prepared, in all material respects, in accordance with Standard Condition 44 of the Regulatory Licence and the Company's accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)"), including ISA (UK) 800, and applicable law, and having regard to the guidance contained in ICAEW Technical Release Tech 02/16 AAF 'Reporting to Regulators on Regulatory Accounts' issued by the Institute of Chartered Accountants in England & Wales.

Our responsibilities under ISAs (UK) are further described in the Auditor's responsibilities for the audit of the Regulatory Accounts section of our report. We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the Regulatory Accounts in the UK, including the Financial Reporting Council's Ethical Standard, and we have fulfilled our ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of matter - special purpose basis of preparation

We have not assessed whether the accounting policies are appropriate to the circumstances of the Company where these are laid down by Standard Condition 44 of the Regulatory Licence. Where Standard Condition 44 of the Regulatory Licence does not give specific guidance on the accounting policies to be followed, our audit includes an assessment of whether the accounting policies adopted in respect of the transactions and balances required to be included in the Regulatory Accounts are consistent with those used in the preparation of the statutory financial statements of Western Power Distribution (West Midlands) plc. Furthermore, as the nature, form and content of regulatory accounts are determined by the Regulator, we did not evaluate the overall adequacy of the presentation of the information.

The Regulatory Accounts is separate from the statutory financial statements of the Company and has not been prepared in accordance with Financial Reporting Standard 101 Reduced Disclosure Framework ("FRS 101"). Financial information other than that prepared on the basis of FRS 101 does not necessarily represent a true and fair view of the financial performance or financial position of a company as shown in statutory financial statements prepared in accordance with the Companies Act 2006.

The Regulatory Accounts on pages 39 to 71 have been drawn up in accordance Standard Condition 44 of the Regulatory Licence with a number of departures from FRS 101.

The Regulatory Accounts are prepared in accordance with a special purpose framework for the specific purpose as described in the respective directors' and auditor's responsibilities sections below. As a result, the Regulatory Accounts may not be suitable for another purpose.

Our opinion is not modified in this respect.

6.2 Independent auditor's report to the Gas and Electricity Markets Authority (the "Regulator") and to Western Power Distribution (West Midlands) plc (the "Company") (continued)

Conclusions relating to going concern

We have nothing to report in respect of the following matters in relation to which ISAs (UK) require us to report to you when:

- the directors' use of the going concern basis of accounting in the preparation of the Regulatory Accounts is not appropriate; or
- the directors have not disclosed in the Regulatory Accounts any identified material uncertainties that may cast significant doubt about the company's ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the Regulatory Accounts are authorised for issue.

Other information

The other information comprises all of the information in the annual report other than the Regulatory Accounts and our auditor's report thereon. The directors are responsible for the other information. Our opinion on the Regulatory Accounts does not cover the other information and, accordingly, we do not express an audit opinion or any form of assurance thereon.

In connection with our audit of the Regulatory Accounts, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Regulatory Accounts or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the Regulatory Accounts or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement or inconsistency of this other information, we are required to report that fact.

We have nothing to report based on these responsibilities

Responsibilities of the Directors

As explained more fully in the Statement of Directors' Responsibilities set out on page 36, the directors are responsible for the preparation of the Regulatory Accounts in accordance with Standard Condition 44 of the Regulatory Licence and the Company's accounting policies.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of the Regulatory Accounts that are free from material misstatement, whether due to fraud or error.

In preparing the Regulatory Accounts, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the Audit of the Regulatory Accounts

Our objectives are to obtain reasonable assurance about whether the Regulatory Accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Regulatory Accounts

and to Western Power Distribution (West Midlands) plc (the "Company") (continued)

Auditors' responsibilities for the Audit of the Regulatory Accounts (continued)

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Use of this report

This report is made, on terms that have been agreed, solely to the Company and the Regulator in order to meet the requirements of Standard Condition 44 of the Regulatory Licence. Our audit work has been undertaken so that we might state to the Company and the Regulator those matters that we have agreed to state to them in an independent auditor's report, in order (a) to assist the company to meet its obligation under the Regulatory Licence to procure such a report and (b) to facilitate the carrying out by the Regulator of its regulatory functions, and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the Regulator, for our audit work, for this report or for the opinions we have formed.

Our opinion on the Regulatory Accounts within the annual report is separate from our opinion on the statutory financial statements of the Company for the year ended 31 March 2018 on which we reported on 23 July 2018, which are prepared for a different purpose. Our audit report in relation to the statutory financial statements of the Company (our "Statutory audit") was made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our Statutory audit work was undertaken so that we might state to the Company's members those matters we are required to state to them in a statutory audit report and for no other purpose. In these circumstances, to the fullest extent permitted by law, we do not accept or assume responsibility for any other purpose or to any other person to whom our Statutory audit report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Cash at bank and in hand at end of year	16	6.9	11.5

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

1. Authorisation of financial statements and statement of compliance with FRS 101

The regulatory financial statements of Western Power Distribution (West Midlands) plc ("the Company") for the year ended 31 March 2018 were authorised for issue by the Board of Directors on 19 July 2018 and the balance sheet was signed on the Board's behalf by RA Symons and IR Williams. The Company is a public limited company, limited by shares and incorporated and domiciled in England and Wales.

The Company meets the definition of a qualifying entity under FRS 100 "Application of Financial Reporting Requirements".

2. Significant accounting policies

Basis of preparation

These financial statements were prepared in accordance with Financial Reporting Standard 101 Reduced Disclosure Framework ("FRS 101") and in accordance with applicable accounting standards.

As permitted by FRS 101, the Company has taken advantage of the disclosure exemptions available under that standard in relation to financial instruments, capital management, presentation of comparative information in respect of certain assets, standards not yet effective, related party transactions and share based payments.

Where required, equivalent disclosures are given in the group accounts of Western Power Distribution plc. The group accounts of Western Power Distribution plc are available to the public and can be obtained as set out in note 25.

The financial statements have been prepared on the historical cost basis. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

The Company's regulatory financial statements are presented in Sterling and all values are rounded to the nearest hundred thousand pounds except when otherwise indicated.

The principal accounting policies adopted are set out below.

Going concern

The directors have prepared the financial statements on a going concern basis as they have a reasonable expectation that the Company has adequate resources to continue in operational existence for the foreseeable future. This is discussed further under 'Financial risk management policies and objectives' within the Directors' report.

Turnover

Turnover is recognised to the extent that it is probable that economic benefits will flow to the Company and that the turnover can be reliably measured. Turnover comprises primarily use of energy system income. Turnover includes an assessment of the volume of unbilled energy distributed to customers between the date of the last meter reading and the period end. Remaining sales relate to the invoice value of other goods and services provided which also relate to the electricity network.

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

2. Significant accounting policies (continued)

Turnover (continued)

Where turnover received or receivable exceeds the maximum amount permitted by regulatory agreement and adjustments will be made to future prices to reflect this over-recovery, no liability is recognised as such an adjustment to future prices relates to the provision of future services. Similarly no asset is recognised where a regulatory agreement permits adjustments to be made to future prices in respect of an under-recovery.

Contributions

Contributions receivable in respect of tangible fixed assets are treated as deferred income, which is credited to the profit and loss account over the estimated weighted life of the related assets of 69 years.

Finance costs

Finance expenses comprise interest payable on borrowings, the release of discount on provisions, and interest on pension scheme liabilities. Interest charges are recognised in the profit and loss account as they accrue, on an effective rate basis.

Leases

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset.

WPD West Midlands as a lessee

Leases where the lessor retains a significant portion of the risks and benefits of ownership of the assets are classified as operating leases and rentals payable are charged to the profit and loss account on a straight line basis over the lease term.

WPD West Midlands as a lessor

Assets leased out under operating leases are include in tangible fixed assets and depreciated over the estimated useful lives. Rental income, including the effect of lease incentives, is recognised on a straight line basis over the term of the lease.

Tangible fixed assets

Tangible fixed assets are stated at cost less accumulated depreciation and impairments. Borrowing costs directly attributable to assets under construction and which meet the recognition criteria in International Accounting Standard ("IAS") 23 are capitalised as part of the cost of that asset.

Expenditure on electricity infrastructure assets relating to increases in capacity or enhancements of the network including qualifying replacement expenditure are treated as additions. Other costs incurred in maintaining the operating capability of the network in accordance with defined standards of service are expensed in the year in which the expenditure is incurred.

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

2. Significant accounting policies (continued)

Tangible fixed assets (continued)

Cost comprises the aggregate amount paid and the fair value of any other consideration given to acquire the asset and includes costs directly attributable to making the asset capable of operating as intended. Employee costs incurred in implementing capital schemes are capitalised within infrastructure assets together with the cost of materials and an appropriate proportion of production overheads.

Contributions received towards the cost of tangible fixed assets which include low carbon network funding are included in trade and other payables as deferred income and credited on a straight-line basis to the profit and loss account over the estimated economic useful lives of the assets to which they relate.

Depreciation is provided on all tangible fixed assets, other than land, on a straight-line basis over its expected useful life as follows:

	<u>Years</u>
Distribution network assets:	
Overhead lines and poles	65
Underground cables	85
Plant and machinery (transformers and switchgear)	55
Meters	3
Other (towers and substation buildings)	Up to 80
Buildings - freehold	Up to 60
Fixtures and equipment	Up to 20
Vehicles and mobile plant	Up to 10

The carrying values of tangible fixed assets are reviewed for impairment if events or changes in circumstances indicate the carrying value may not be recoverable, and are written down immediately to their recoverable amount. Useful lives and residual values are reviewed annually and where adjustments are required these are made prospectively.

An item of tangible fixed assets is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the derecognition of the asset is included in the profit and loss account in the period of derecognition.

Intangible assets

Costs directly associated with the development of computer software for internal use are capitalised where technical feasibility can be demonstrated, the Company is satisfied that future economic benefits will flow to the Company and the cost can be separately identified and reliably measured. Software is measured initially at cost and amortised on a straight-line basis over its estimated useful life. Carrying amount is reduced by any provision for impairment where necessary. The estimated useful life assigned to computer software is up to five years.

Stocks

Stocks are stated at the lower of cost and net realisable value. Cost is determined using the weighted average method and includes expenditure incurred in acquiring the inventories and bringing them to their existing location and condition. It excludes borrowing costs.

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

2. Significant accounting policies (continued)

Taxation

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates and laws that are enacted or substantively enacted by the balance sheet date.

Deferred income tax is recognised on all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements, with the following exceptions:

- where the temporary difference arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss;
- deferred income tax assets are recognised only to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, carried forward tax credits or tax losses can be utilised.

Deferred income tax assets and liabilities are measured on an undiscounted basis at the tax rates that are expected to apply when the related asset is realised or liability is settled, based on tax rates and laws enacted or substantively enacted at the balance sheet date.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date. Deferred income tax assets and liabilities are offset only if a legally enforceable right exists to set off current tax assets against current tax liabilities, the deferred income taxes relate to the same taxation authority and that authority permits the Company to make a single net payment.

Income tax is charged or credited to other comprehensive income if it relates to items that are charged or credited to other comprehensive income. Similarly, income tax is charged or credited directly to equity if it relates to items that are credited or charged directly to equity. Otherwise income tax is recognised in the profit and loss account.

Pension benefits

The Company participates in one defined benefit pension plan, which is a section of the industry-wide Electricity Supply Pension Scheme ('ESPS'). The ESPS scheme is, with very limited exception, closed to new members. A defined contribution plan is offered to new employees. The Company also has an unfunded pension liability in respect of previous executives.

The ESPS is a group defined benefit pension plan that shares risks between entities under common control. Under FRS 101, the scheme has been accounted for as a defined benefit scheme by the Company as it has legal responsibility for the plan which it holds jointly with WPD East Midlands. The net defined benefit cost and net deficit of the plan have been allocated to WPD West Midlands and WPD East Midlands in accordance with pensionable salaries.

The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method, which attributes entitlement to benefits to the current period (to determine current service cost) and to the current and prior periods (to determine the present value of defined benefit obligation) and is based on actuarial advice. Past service costs, resulting from either a plan amendment or a curtailment (a reduction in future obligations as a result of a material reduction in the plan membership), are recognised immediately when amendments or curtailments occur. The current service cost (including administration costs) is allocated to the profit and loss account or capital expenditure as appropriate.

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

2. Significant accounting policies (continued)

Pension benefits (continued)

Net interest expense related to pension benefits represents the net change in the present value of plan obligations and the value of plan assets resulting from the passage of time, and is determined by applying the discount rate to the present value of the benefit obligation at the start of the year and to the fair value of plan assets at the start of the year, taking into account expected changes in the obligation or plan assets during the year. Net interest expense relating to pension benefits is recognised in the profit and loss account.

Remeasurement of the net defined benefit liability or asset, comprising actuarial gains or losses, and the return on plan assets (excluding amounts included in net interest described above) are recognised within other comprehensive income in the period in which they occur.

The defined benefit pension plan deficit in the balance sheet comprises the total of the present value of the defined benefit obligation (using a discount rate based on high quality corporate bonds), less the fair value of plan assets out of which the obligations are to be settled directly. Fair value is based on the market price information and in the case of quoted securities is the published bid price.

Contributions to defined contribution schemes are recognised in the profit and loss account or capital expenditure as appropriate in the year in which they become payable.

Share-based payments

The cost of cash-settled transactions is measured at fair value using an appropriate option pricing model. Fair value is established at each balance sheet date from grant date until the awards are settled. During the vesting period a liability is recognised representing the product of the fair value of the award and the portion of the vesting period expired as at the balance sheet date. From the end of the vesting period until settlement, the liability represents the full fair value of the award as at the balance sheet date. Changes in the carrying amount of the liability are recognised in profit or loss for the year.

Provisions

Provisions are recognised when the Company has a legal or constructive obligation as a result of a past event, it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. If the effect is material, expected future cash flows are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability.

Dividend distribution

Dividend distribution to the Company's shareholder is recognised as a liability in the financial statements in the year in which the dividends are approved by the Company's directors.

Financial assets

Financial assets are classified as loans and receivables; financial assets at fair value through profit or loss; derivatives designated as hedging instruments in an effective hedge; held-to-maturity financial assets; or as available-for-sale financial assets, as appropriate. The Company's financial assets include cash at bank and in hand, trade receivables, other receivables and loans. The Company determines the classification of its financial assets at initial recognition. Financial assets are recognised initially at fair value, normally being the transaction price plus, in the case of financial assets not at fair value through profit or loss, directly attributable transaction costs.

The subsequent measurement of financial assets depends on their classification as follows:

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

2. Significant accounting policies (continued)

Financial assets (continued)

Loans and receivables

Loans and receivables are carried at amortised cost using the effective interest method. Trade and other debtors are recognised and carried at the lower of their original invoiced amount and recoverable amount. Provision for impairment is made through the profit and loss account when there is objective evidence that the Company will not be able to recover balances in full. Balances are written off when the probability of recovery is assessed as being remote.

Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to insignificant risk of changes in value and have a maturity of three months or less from the date of acquisition.

Financial liabilities

Financial liabilities are classified as financial liabilities at fair value through profit or loss; derivatives designated as hedging instruments in an effective hedge; or as financial liabilities measured at amortised cost, as appropriate. The Company's financial liabilities include trade and other payables, accruals and most items of financial debt. The Company determines the classification of its financial liabilities at initial recognition. The measurement of financial liabilities depends on their classification, as follows:

Financial liabilities measured at amortised cost

All financial liabilities are initially recognised at fair value. For interest-bearing loans and borrowings this is the fair value of the proceeds received net of directly attributable issue costs.

After initial recognition, interest bearing loans are subsequently measured at amortised cost using the effective interest method. Amortised cost is calculated by taking into account any issue costs and any discount or premium on settlement. Gains and losses arising on the repurchase, settlement or cancellation of liabilities are recognised respectively in interest and other income and finance costs.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily take a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective assets. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

3. Critical accounting judgements and key sources of estimation uncertainty

In the application of the Company's accounting policies, which are described in note 2, the directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

3. Critical accounting judgements and key sources of estimation uncertainty (continued)

The key assumptions concerning the future, and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

Critical judgements in applying the Company's accounting policies

The following is the critical judgement, apart from those involving estimations (which are dealt with separately below), that the directors have made in the process of applying the Company's accounting policies and that have the most significant effect on the amounts recognised in the financial statements.

Capitalisation of overheads

Indirect costs are initially charged to the profit and loss account. A proportion is then capitalised based on an assessment of the allocation of direct costs between operating activities and those which are capitalised as they provide long term benefit.

Key sources of estimation uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

Pension obligations

The Company has a commitment, mainly through the ESPS, to pay pension benefits. The cost of these benefits and the present value of the Company's pension liabilities depend on such factors as the life expectancy of the members, the salary progression of current employees, the return that the pension fund assets will generate in the time before they are used to fund the pension payments and the discount rate at which the future pension payments are discounted. Based on advice from external actuaries, the Company uses estimates for all these factors in determining the pension costs and liabilities incorporated in the financial statements. The assumptions reflect historical experience and management's judgement regarding future expectations. Refer to note 20 for sensitivity information.

4. Segmental reporting

Condition 44.7 of the licence requires a segmental analysis as follows:

	Turnover	Operating expenses	Operating profit	Capital expenditure
	2018	2018	2018	2018
	£m	£m	£m	£m
Distribution	474.0	(172.0)	302.0	244.2
Distributed generation	1.2	(0.5)	0.7	6.6
Directly remunerated services (excluding metering)	17.7	(17.3)	0.4	38.8
Metering equipment and services	2.1	(2.5)	(0.4)	0.1
De minimis	1.7	(1.8)	(0.1)	0.5
Other consented services	-	-	-	-
Out of area networks	-	-	-	-
	496.7	(194.1)	302.6	290.2

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

4. Segmental reporting (continued)

	Turnover	Operating expenses	Operating profit	Capital expenditure
	2017	2017	2017	2017
	£m	£m	£m	£m
Distribution	497.3	(164.9)	332.4	256.0
Distributed generation	1.1	(1.1)	-	14.1
Directly remunerated services (excluding metering)	12.6	(12.9)	(0.3)	31.2
Metering equipment and services	2.2	(3.5)	(1.3)	-
De minimis	2.4	(1.8)	0.6	0.5
Other consented services	-	-	-	-
Out of area networks	-	-	-	-
	515.6	(184.2)	331.4	301.8

Directly remunerated services (excluding metering), previously called excluded services, comprise connection services, diversionary works under an obligation, works required by any alteration of premises, top-up, standby and enhanced system security and revenue protection services which are defined as per the licence conditions.

De minimis activity is business conducted or carried on by the licensee other than the distribution business as defined in the licence conditions.

Other consented activity is any business or activity conducted or carried on by the licensee other than the distribution business to which Ofgem has given its consent in accordance with paragraph 29.4(c) of the licence. This includes internal income from other WPD companies and associated costs.

Values shown are based on amounts reported to Ofgem under the relevant Regulatory Instructions and Guidance. The basis of allocation to segments may therefore change between years as these instructions change. This is particularly true between price controls; values in 2014/15 were reported under the DPCR5 Regulatory Instructions and Guidance whereas values reported in 2015/16 are reported under those for RIIO-ED1.

Revenue from its five largest customers amounted to £110.8m, £71.0m, £63.1m, £58.1m and £53.1m (2017: £105.6m, £91.2m, £71.3m, £65.1m and £59.3m).

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

5. Operating expenses

The directors consider that the nature of the business is such that the analysis of expenses shown below is more informative than that set out in the formats specified by the Companies Act 2006.

	2018 £m	2017 £m
Employee costs (note 10)	40.2	38.9
Depreciation	66.7	65.9
Amortisation of intangible assets	0.5	0.4
Amortisation of customer contributions	(12.8)	(12.1)
Property taxes	29.3	28.0
Other operating expenses	70.2	63.1
Operating expenses	194.1	184.2

6. Operating profit

	2018 £m	2017 £m
Operating profit is stated after charging/(crediting):		
Depreciation *	66.7	65.9
Amortisation of intangible assets	0.5	0.4
Operating lease rentals:		
Plant, machinery and equipment	2.8	3.1
Land and buildings	2.2	2.2
Amortisation of customer contributions	(12.8)	(12.1)
Research and development **	0.1	0.1
Auditors' remuneration:		
Fees payable to the Company's auditors for the audit of the Company's annual accounts	0.3	0.2
Non audit fee	-	-

* Depreciation of fixed assets is stated net of depreciation capitalised of £9.6m (2017: £10.0m) in respect of equipment consumed during the construction of the electricity network.

** Research and development costs above exclude expenditure on Low Carbon Network and Network Innovation Allowance projects which is capitalised together with associated funding received.

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

7. Interest

	2018 £m	2017 £m
Interest receivable		
Interest on loans to other WPD undertakings	(0.1)	(0.2)
Other	-	(0.2)
Total interest receivable	(0.1)	(0.4)
Interest payable		
Interest payable on bank loans and overdrafts	0.7	0.6
Interest payable on loans from other WPD undertakings	0.1	0.1
Interest payable on other loans	77.8	77.5
Less: interest capitalised	(0.9)	(0.8)
Total interest payable	77.7	77.4
Net interest expense	77.6	77.0

Interest in 2018 was capitalised at a rate of 2.1% (2017: 3.0%), based on the yield on the Company's borrowings.

8. Tax

Tax charged to the profit and loss account:	2018 £m	2017 £m
Current tax:		
UK corporation tax on profits for the year	30.2	12.7
Adjustment in respect of prior years	(1.6)	(0.3)
Deferred tax (note 19):		
Relating to the origination and reversal of timing differences	8.9	32.1
Impact of change in corporation tax rate	(0.2)	(12.3)
Adjustment in respect of prior years	0.1	0.2
Tax expense in the profit and loss account	37.4	32.4

The tax on the Company's profit before tax differs from the theoretical amount that would arise using the standard rate of corporation tax in the UK of 19% (2017: 20%) as follows:

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

8. Tax (continued)

	2018 £m	2017 £m
Profit before tax	224.6	254.8
Profit multiplied by standard rate of corporation tax in the UK of 19% (2017: 20%)	42.6	51.0
Effects of:		
Expenses not deductible and income not taxable for tax purposes	-	(0.2)
Impact of tax rate change	(0.2)	(12.3)
Adjustments to tax charge in respect of prior years	(1.5)	(0.1)
Group relief received for free	(3.5)	(6.0)
Total tax expense reported in the profit and loss account	37.4	32.4

In addition to the amount charged to the profit and loss account, the following amounts relating to tax have been recognised in other comprehensive income.

	2018 £m	2017 £m
Deferred tax:		
On cash flow hedges	(0.2)	(0.2)
On remeasurement gain/(loss) on defined benefit pension scheme	0.2	(19.9)
Total tax credit in the statement of other comprehensive income	-	(20.1)

Change in corporation tax rate

From 1 April 2017 the standard rate of corporation tax was reduced from 20% to 19%. In addition the Finance Act 2016 reduced the standard rate of corporation tax to 17% from 1 April 2020. This future change has been enacted and the impact included in these financial statements.

9. Dividends

	2018 £m	2017 £m
Dividends on equity shares:		
Interim dividends - 70.2 pence per share (2017: 49.1 pence per share)	165.0	90.8

The WPD Group is structured such that a proportion of the WPD Group's debt is issued by group companies other than WPD East Midlands, WPD West Midlands, WPD South West and WPD South Wales. Interest payments on this debt, together with other items, are funded primarily through dividend payments from WPD East Midlands, WPD West Midlands, WPD South West and WPD South Wales.

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

10. Employee benefit expense

Employee benefit expense, including directors' remuneration, was as follows:

	2018	2017
	£m	£m
Wages and salaries	101.9	100.3
Social security costs	11.9	11.8
Pension costs	20.0	15.6
Total employee costs	133.8	127.7
Less allocated to capital expenditure	(93.6)	(88.8)
Charged to the profit and loss account	40.2	38.9

There are no personnel, other than the directors, who as key management have authority and responsibility for planning, directing and controlling activities, directly or indirectly, of the Company.

The average number of employees in the year was 2,022 (2017: 2,006). This includes a proportion of other WPD DNO staff who work in part for WPD West Midlands and excludes a proportion of WPD West Midlands staff who work in part for other WPD DNOs. All employees work for the network distribution business.

11. Directors' emoluments

The service contracts for the executive directors are with WPD South West. However, the emoluments detail given in this note represents total emoluments of the directors for all services provided to WPD companies as a whole. The costs are apportioned between WPD South Wales, WPD South West, WPD West Midlands and WPD East Midlands.

	<u>Highest paid director</u>		<u>Total</u>	
	2018	2017	2018	2017
	£000	£000	£000	£000
The emoluments of the executive directors comprised:				
Base salary (note i)	607	594	1,629	1,518
Performance dependent bonus (note ii)	580	552	1,201	1,097
Pension compensation allowance (note iii)	-	-	345	808
Sub total directors' emoluments	1,187	1,146	3,175	3,423
Long term incentive plan (note iv)	691	1,245	1,250	2,509
Fees to the independent non executive director (note vi)	-	-	100	61
	1,878	2,391	4,525	5,993

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

11. Directors' emoluments (continued)

(i) Base salary also includes benefits in kind.

(ii) The amount of the annual bonus is based on WPD's financial performance, the reliability of the electricity network, and other factors.

(iii) As a result of changes in tax applicable to UK pensions, the executive directors have resigned as active members of the Electricity Supply Pension Scheme ("ESPS" - note 20). Thus WPD no longer contributes for ongoing service to the ESPS in respect of the executive directors. Instead and subject to their service contract, WPD pays cash compensation to them individually equivalent to the value of WPD's contribution in to the ESPS that would have been made had they remained active members (as determined by external actuaries).

(iv) Under a long term incentive plan, the executive directors were granted phantom stock options. The option price is set at the quoted share price of WPD's parent in the US, PPL Corporation, at the date the phantom options were granted. Options outstanding may be exercised during fixed periods and the gain is payable through the payroll. The values above include any payments made to the executive directors in respect of gains in value of phantom options exercised in the year. None of the executive directors was granted new options in either year; no executive directors exercised options (2017: three). In addition, the executive directors receive annually a grant of PPL Corporation shares which cannot generally be accessed for three years; a number of these shares is dependent on the achievement of certain criteria at PPL. The value of the shares granted in the year is shown within this line.

(v) The independent UK non executive directors are entitled to fees as determined by the appropriate Board. No emoluments are paid to US based non-executive directors, who are officers of PPL, in respect of their services as directors to the WPD Group.

(vi) During the year, four executive directors (2017: four) were members of the defined benefit ESPS. At 31 March 2018, the highest paid director had accrued annual pension benefits of £585,456. The benefits shown assume that an option to convert an element of the annual benefits to a lump sum payable on retirement is not exercised.

6.7 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

12. Tangible fixed assets

	Non network land & buildings £m	Distribution network £m	Fixtures & equipment £m	Vehicles & mobile plant £m	Total £m
Cost					
At 1 April 2017	5.1	4,645.6	59.9	29.8	4,740.4
Additions	8.5	261.9	16.4	1.1	287.9
Transfer from Group undertaking	0.1	-	-	-	0.1
Disposals and retirements	-	-	(6.2)	(0.3)	(6.5)
At 31 March 2018	13.7	4,907.5	70.1	30.6	5,021.9
Depreciation					
At 1 April 2017	-	1,130.1	26.5	9.6	1,166.2
Charge for the year	0.2	62.8	9.6	3.7	76.3
Disposals and retirements	-	-	(6.2)	(0.1)	(6.3)
At 31 March 2018	0.2	1,192.9	29.9	13.2	1,236.2
Net book value					
At 31 March 2018	13.5	3,714.6	40.2	17.4	3,785.7
At 31 March 2017	5.1	3,515.5	33.4	20.2	3,574.2

The net book value of land and buildings reported within distribution network assets comprises:

	2018 £m	2017 £m
Freehold	214.2	189.6
Short leasehold	6.3	6.5

Included within the Company's fixed assets are assets in the course of construction amounting at 31 March 2018 to £29.2m (2017: £38.5m) and land at a cost of £82.5m (2017: £75.2m).

Included in additions are staff costs of £93.6m (2017: £88.8m).

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

13. Intangible assets

	Computer software £m
Cost	
At 1 April 2017	2.8
Additions	2.3

14. Stocks

	2018 £m	2017 £m
Raw materials and consumables	2.3	2.3
Work in progress	0.1	0.2
<hr/>		
	2.4	2.5
<hr/>		

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

15. Debtors

	2018 £m	2017 £m
Amounts falling due within one year:		
Trade debtors	80.0	83.1
Amounts owed by other WPD undertakings	26.7	32.2
Prepayments and accrued income	7.6	5.2
Amounts falling due after more than one year:		
Other debtors	1.0	0.6
	115.3	121.1

Amounts owed by other WPD undertakings are unsecured and are repayable on demand.

16. Cash at bank and in hand

	2018 £m	2017 £m
Cash at bank	6.9	3.5
Short-term bank deposits	-	8.0
Cash at bank and in hand	6.9	11.5

At 31 March 2018, the Company had available £281.0m (2017: £300.0m) of undrawn committed borrowing facilities in respect of which all conditions precedent had been met. All facilities incur commitment fees at market rates. WPD East Midlands has a similar £300.0m facility, of which £170.0m is undrawn as at 31 March 2018 (2017: £175.0m). In addition all four WPD DNOs have access to an uncommitted facility from which any DNO can draw but which in aggregate cannot exceed £20.0m; no borrowings had been drawn against this facility as at 31 March 2018 (2017: £nil).

Included in cash and short-term bank deposits are restricted amounts totalling £6.4m (2017: £3.2m) which are not readily available for the general purposes of the Company. The restrictions relate to cash balances that can only be used for Low Carbon Network Fund projects.

For the purposes of the cash flow statement, cash at bank and in hand comprise the following at 31 March:

	2018 £m	2017 £m
Cash at bank and in hand (from above)	6.9	11.5

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

17. Creditors

	2018 £m	2017 £m
Amounts falling due within one year:		
Short-term borrowing	19.0	-
Payments received on account	43.4	45.4
Trade creditors	11.3	9.8
Amounts owed to other WPD undertakings	41.4	9.8
UK corporation tax	13.6	3.6
Other taxation and social security	18.6	18.4
Other creditors	1.0	2.1
Deferred contributions	12.8	12.1
Accruals and deferred income	107.0	102.8
	268.1	204.0
	2018 £m	2017 £m
Amounts falling due after more than one year:		
Deferred contributions	651.9	615.7
Unsecured borrowings repayable after more than five years:		
£250m 6.0% bonds 2025	248.0	247.8
£800m 5.75% bonds 2032	790.5	789.8
£400m 3.875% bonds 2024	396.4	395.8
	2,086.8	2,049.1

Amounts owed to other WPD undertakings are unsecured and are repayable on demand.

Unsecured borrowings are stated net of unamortised issue costs of £5.0m (2017: £5.5m) and discount on issue of £10.1m (2017: £11.1m). These costs together with the interest expense are allocated to the profit and loss account over the term of the bonds at a constant rate on the carrying amount.

All interest on bonds is paid annually.

18. Provisions for liabilities

	Deferred taxation (note 19) £m	Asset retirement obligation £m	Other £m	Total £m
At 1 April 2017	172.6	11.6	2.5	186.7
Released during the year	8.9	1.5	1.0	11.4
Utilised during the year	-	(0.4)	(0.6)	(1.0)
At 31 March 2018	181.5	12.7	2.9	197.1

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

18. Provisions for liabilities and charges (continued)

Asset retirement obligations ("ARO") relate to an estimate of the costs of dismantling and removing items of property, plant and equipment at the end of their useful life and are expected to be settled over the next 70 years. The effect of discounting on AROs is not material and is therefore not shown separately.

Other provisions at 31 March 2018 substantially relate to uninsured losses and an expected settlement of liabilities relating to the Electricity Association Technology Limited ("EATL") of £1.5m relating primarily to a pension deficit relating to that company. The liability in respect of the EATL is being settled over a period of approximately nine years; the directors expect the remaining provisions to be settled within the next two years.

19. Deferred tax

	Accelerated capital allowances £m	Retirement benefit obligations £m	Other £m	Total £m
At 1 April 2016	183.0	(4.7)	(5.6)	172.7
Charge to the profit and loss account	10.3	19.7	2.1	32.1
Change in corporation tax rate	(12.3)	-	0.1	(12.2)
Credit to equity	-	(19.9)	(0.1)	(20.0)
At 1 April 2017	181.0	(4.9)	(3.5)	172.6
Charge to the profit and loss account	10.6	(3.7)	1.9	8.8
Charge to equity	-	0.2	(0.1)	0.1
At 31 March 2018	191.6	(8.4)	(1.7)	181.5

Certain deferred tax assets and liabilities have been offset. The following is an analysis of the deferred tax balances (after offset) for financial reporting purposes:

	2018 £m	2017 £m
Deferred tax liabilities	191.6	182.2
Deferred tax assets	(11.2)	(9.6)
Provision for deferred tax at 31 March	180.4	172.6

The net deferred tax liability due after more than one year is £192.6m (2017: £180.6m).

Deferred tax assets are recognised for tax loss carry-forwards to the extent that the realisation of the deferred tax benefit through future taxable profits is probable. The Company did not recognise deferred tax assets of £40.4m (2017: £40.4m) in respect of capital losses amounting to £237.5m (2017: £237.6m) that can be carried forward against future taxable chargeable gains as there is no use of these assets for the foreseeable future.

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

20. Pension commitments

Electricity Supply Pension Scheme ("ESPS")

The ESPS provides pension and other related defined benefits based on final pensionable pay to employees throughout the electricity industry. One segment of the ESPS (the Central Networks Group segment) relates to WPD West Midlands and WPD East Midlands and most employees of these companies are members of the ESPS. These two companies are liable for the Central Networks Group segment and would benefit from any surplus if wound up. The assets are held in a trustee administered fund.

The Central Networks Group segment of the ESPS is closed to new members except in very limited circumstances; existing members are unaffected. A defined contribution scheme is offered to new employees.

The liability recognised in the balance sheet in respect of the defined benefit pension plan is the present value of the defined benefit obligation at the end of the reporting period less the fair value of the plan assets. The defined benefit obligation is calculated annually by independent actuaries, Aon Hewitt Limited, using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash flows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits are paid, and that have terms to maturity approximating to the terms of the related pension obligation.

Actuarial gains and losses arising from experience adjustments and changes to actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise.

Past-service costs are recognised immediately in income.

The scheme is a funded, defined benefit, final salary pension plan. The level of benefits provided depends on members' length of service and their salary at their date of leaving the Company. The majority of pensions in payment receive inflationary increases in line with the RPI (Retail Prices Index) inflation. The benefit payments are from trustee-administered funds. The amount of contributions to be paid is decided jointly by the employer and the Trustees of the Scheme. Assets held in trust are governed by UK regulations and practice. The scheme's investment strategy is decided by the Trustees, in consultation with the employer. The Board of Trustees must be composed of representatives of the employer and plan participants in accordance with the scheme's legal documentation.

The net defined benefit cost and net deficit of the plan have been allocated to WPD West Midlands and WPD East Midlands in accordance with pensionable salaries, currently 53.9% to WPD West Midlands (2017: 53.7%). The figures below show the proportion allocated to WPD West Midlands.

The Company also has an unfunded obligation which relates to previous executives.

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

20. Pension commitments (continued)

Electricity Supply Pension Scheme ("ESPS") (continued)

The amounts recognised in the balance sheet are determined as follows:

	2018 £m	2017 £m
Present value of obligations	1,866.8	1,873.3
Fair value of scheme assets	(1,824.0)	(1,848.7)
Deficit of funded plan	42.8	24.6
Unfunded pension obligation (not part of ESPS)	1.0	1.1
Total pension liability recognised in the balance sheet	43.8	25.7

The regulator, Ofgem, currently allows ongoing service costs and a proportion of the deficit costs to be recovered through regulated income.

Analysis of the amount charged to profit before interest and taxation or to capital expenditure:

	2018 £m	2017 £m
Current service cost	17.5	13.4
Administrative costs	1.2	1.1
Operating charge relating to defined benefit plans	18.7	14.5
Interest income on plan assets	(45.7)	(52.1)
Interest on plan liabilities	46.3	52.2
Other finance expense	0.6	0.1

The operating charge is allocated to the operating expenses in the profit and loss account or to capital expenditure as appropriate.

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

20. Pension commitments (continued)

Electricity Supply Pension Scheme ("ESPS") (continued)

Analysis of the amount recognised in other comprehensive income:

	2018	2017
	£m	£m
Loss/(gain) on plan assets excluding amounts included in interest income	9.4	(206.3)
(Gain)/loss from change in financial assumptions	(22.2)	321.6
Experience losses/(gains)	18.1	(16.4)
Change in percentage allocation rate	(6.4)	1.8
Remeasurement (gain)/loss recognised in other comprehensive income	(1.1)	100.7

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

20. Pension commitments (continued)

Electricity Supply Pension Scheme ("ESPS") (continued)

The movement in the net defined benefit obligation over the accounting period is as follows:

	Year ended 31 March 2018			Year ended 31 March 2017		
	Present value of obligation £m	Fair value of plan assets £m	Total £m	Present value of obligation £m	Fair value of plan assets £m	Total £m
Liability at 1 April	1,873.3	(1,848.7)	24.6	1,488.8	(1,465.3)	23.5
Current service cost	17.5	-	17.5	13.4	-	13.4
Administrative cost	1.2	-	1.2	1.1	-	1.1
Interest expense	46.3	(45.7)	0.6	52.2	(52.1)	0.1
	65.0	(45.7)	19.3	66.7	(52.1)	14.6
Remeasurements:						
Loss/(gain) on plan assets excluding amounts included in interest income	-	9.4	9.4	-	(206.3)	(206.3)
(Gain)/loss from change in financial assumptions	(22.2)	-	(22.2)	321.6	-	321.6
Experience losses/(gains)	18.1	-	18.1	(16.4)	-	(16.4)
Change in percentage allocation rate	6.9	(13.3)	(6.4)	84.7	(82.9)	1.8
	2.8	(3.9)	(1.1)	389.9	(289.2)	100.7
Contributions:						
Employer	-	-	-	-	(114.2)	(114.2)
Plan participants	2.9	(2.9)	-	2.8	(2.8)	-
	2.9	(2.9)	-	2.8	(117.0)	(114.2)
Payments from plan:						
Benefit payments	(76.0)	76.0	-	(73.8)	73.8	-
Administrative costs	(1.2)	1.2	-	(1.1)	1.1	-
	(77.2)	77.2	-	(74.9)	74.9	-
Liability/(asset) at 31 March	1,866.8	(1,824.0)	42.8	1,873.3	(1,848.7)	24.6

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

20. Pension commitments (continued)

Electricity Supply Pension Scheme ("ESPS") (continued)

The significant actuarial assumptions made were as follows:

	2018	2017
RPI inflation	3.00%	3.00%
CPI inflation	1.90%	1.90%
Rate of general long-term salary increases	3.75%	3.75%
RPI linked pension increases (with 5% cap)	2.95%	2.95%
Post-88 GMP pension increases	1.80%	1.80%
Discount rate for scheme liabilities	2.58%	2.51%

Assumptions relating to future mortality are set based on actuarial advice in accordance with published statistics and experience. These assumptions translate into an average life expectancy in years for a member at age 60:

	31 March 2018	31 March 2017
Mortality table adopted	Based on S2PXA base tables with CMI 2015 core projections and a 1.0% per annum long-term improvement rate	Based on S1PXA base tables with CMI 2011 core projections and a 1.0% per annum long-term improvement rate
Life expectancy for a male currently aged 60	26.7	26.6
Life expectancy for a female currently aged 60	28.8	28.7
Life expectancy at 60 for a male currently aged 40	27.7	27.6
Life expectancy at 60 for a female currently aged 40	30.0	29.9

The sensitivity of the defined benefit obligation to changes in the principal assumptions is:

	Change in assumption %	Impact on defined benefit obligation £m
Discount rate	+/-0.50%	+164.3 / -152.5
RPI inflation	+/-0.50%	+148.1 / -140.2
Life expectancy	+ 1 year	85.3

The above sensitivity analysis on the discount rate is based on a change in assumption while holding all other assumptions constant. The change in RPI inflation assumption impacts on the salary increases, CPI assumption, revaluation in deferment and pension increase assumptions. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the pension liability recognised in the balance sheet.

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

20. Pension commitments (continued)

Electricity Supply Pension Scheme ("ESPS") (continued)

The Central Networks Group of the ESPS scheme assets are comprised as follows:

	31 March 2018		31 March 2017	
	Total £m	Of which not quoted in an active market £m	Total £m	Of which not quoted in an active market £m
Equities	328.0	-	271.9	-
Global credit	54.3	-	51.0	-
Property	110.5	110.5	103.2	103.2
Macro-orientated	192.0	192.0	246.4	246.4
Multi strategy	403.9	-	345.6	-
LDI strategy	741.0	-	837.7	-
Other	(5.7)	-	(8.2)	-
Total	1,824.0	302.5	1,847.6	349.6

There is no self-investment in the Scheme.

Through its defined benefit pension plan, the Company is exposed to a number of risks, the most significant of which are detailed below:

Asset volatility	The liabilities are calculated using a discount rate set with reference to corporate bond yields; if assets underperform this yield, this will create a deficit. The scheme holds a significant proportion of growth assets (e.g. equities) which are expected to outperform corporate bonds in the long-term while providing volatility and risk in the short-term. The allocation to growth assets is monitored such that it is suitable with the scheme's long-term objectives.
Change in bond yields	A decrease in corporate bond yields will increase the scheme's liabilities, although this will be partially offset by an increase in the value of the scheme's bond holdings.
Inflation risk	The majority of the scheme's benefit obligations are linked to inflation, and higher inflation will lead to higher liabilities (although, in most cases, caps on the level of inflationary increases are in place to protect against extreme inflation). The majority of the assets are either unaffected by or loosely correlated with inflation, meaning that an increase in inflation will increase the deficit.
Life expectancy	The majority of the scheme's obligations are to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the liabilities.

The scheme use government bonds, corporate bonds and cash as matching assets. The remainder of the assets are used as growth assets.

A contingent liability exists in relation to the equalisation of Guaranteed Minimum Pension ("GMP"). The UK Government intends to implement legislation which could result in an increase in the value of GMP for some categories of member. This would increase the defined benefit obligation of the plan. At this stage, it is not possible to quantify the impact of this change.

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

20. Pension commitments (continued)

Electricity Supply Pension Scheme ("ESPS") (continued)

The employer has agreed that it will aim to eliminate the scheme actuarial deficit (as assessed on the ongoing funding basis) by 31 March 2026.

The current agreed employer contributions are 27.9% per annum of pensionable salaries in respect of future benefit accrual, expenses (including PPF levies) and death in service benefits, plus an additional £2.0m per annum in respect of expenses. The Company made a £55.0m prepayment in respect of deficit recovery and future service contributions on 30 March 2017. Company contributions are expected to recommence from 1 April 2018 with deficit contributions of £43.0m per annum payable from 1 April 2018 to 31 March 2021 and £25.8m per annum payable from 1 April 2021 to 31 March 2026.

Funding levels are monitored on a regular basis and the next triennial valuation is due to be completed as at 31 March 2019.

Current expected employer contributions to the WPD West Midlands segment of the scheme for the year ending 31 March 2019 are £54.9m. Note for the year 1 April 2018 to 31 March 2019 contributions payable have been offset to allow for the overpayment of contributions as a result of the lump sum prepayment made on 30 March 2017. The results of the actuarial funding valuation as at 31 March 2019 may give rise to a revised schedule of contributions and as such the quantities above may be liable to change.

The weighted average duration of the defined benefit obligation is around 17 years.

Other scheme

WPD also operates a defined contribution scheme. The assets of the scheme are held separately from those of WPD in an independent fund administered by the scheme trustee. The scheme has two sections and the following relates to the WPD Group as a whole:

(a) a closed section with no active members. All of the active members in this scheme have transferred to the ESPS. At 31 March 2018 there were 204 members with deferred benefits in the scheme (2017: 208) and 3 pensioners (2017: 3). Market value of the assets was £2.2m (2017: £2.2m).

(b) a new pension arrangement available to all new employees in WPD with effect from 1 April 2010. At 31 March 2018 there were 3,544 members (2017: 3,288). The market value of the assets of the open section of the scheme was £73.9m (2017: £60.3m). Employer contributions to the scheme across WPD amounted to £7.6m in the year (2017: £6.7m).

21. Authorised and issued share capital

	2018	2017
	£	£
Authorised:		
235,050,000 ordinary shares of £1 each	235,050,000	200,000,000

6.8 Notes to the Regulatory Financial Statements

For the year ended 31 March 2018

21. Authorised and issued share capital (continued)

Allotted, called-up and fully paid:

Ordinary shares of £1 each

	Number	£
At 1 April 2017	185,050,000	185,050,000
Issue of equity shares	50,000,000	50,000,000
At 31 March 2018	235,050,000	235,050,000

During March 2018 the Company issued 50,000,000 ordinary shares at par to WPD Distribution Network Holdings Limited. The proceeds were used for general corporate purposes.

22. Reserves

	Share premium account £m	Hedging reserve £m	Profit & loss account £m
At 1 April 2016	713.6	3.7	293.9
Profit for the financial year	-	-	222.4
Net movement on cash flow hedges (net of tax)	-	(0.6)	-
Dividends paid	-	-	(90.8)
Actuarial losses on defined benefit pension plan (net of tax)	-	-	(81.0)
At 31 March 2017	713.6	3.1	344.5
Profit for the financial year	-	-	187.2
Net movement on cash flow hedges (net of tax)	-	(0.6)	-
Dividends paid	-	-	(165.0)
Actuarial gains on defined benefit pension plan (net of tax)	-	-	0.9
At 31 March 2018	713.6	2.5	367.6

The share premium account arose on the issue of shares prior to the acquisition as settlement of intercompany balances within the group at that time.

The hedging reserve is stated net of tax and relates to:

- the effective portion of the cumulative net change in fair value of interest rate derivatives entered into in anticipation of the future issuance of long-term debt.
- the effective portion of the value paid in respect of interest rate derivatives associated with the issuance of existing long-term debt. The interest rate derivatives were settled in prior years and the gain continues to be amortised through the profit and loss account over the term of the debt.

For the year ended 31 March 2018

23. Contingent liabilities

Legal proceedings

WPD West Midlands is party to various legal claims, actions and complaints. Although WPD West Midlands is unable to predict with certainty whether or not it will ultimately be successful in these legal proceedings or, if not, what the impact might be, the directors currently believe that disposition of these matters will not have a materially adverse effect on WPD West Midlands' financial statements.

24. Commitments

Capital commitments

Capital expenditure contracted for at the balance sheet date but not recognised in the financial statements is as follows:

	2018	2017
	£m	£m
Tangible fixed assets	10.3	15.0

Operating lease commitments - WPD West Midlands as lessee

WPD West Midlands leases various properties under non-cancellable operating lease arrangements. The leases have various terms, escalation clauses and renewable rights. WPD West Midlands also leases plant and machinery under non-cancellable operating leases which are usually very short-term.

Future minimum rentals payable under non-cancellable operating leases at 31 March are as follows:

	2018	2018	2017	2017
	Land &	Plant &	Land &	Plant &
	building	machinery	building	machinery
	£m	£m	£m	£m
In the first year	0.1	0.5	0.2	0.5
In the second to fifth year	0.2	1.9	0.8	1.8
In more than five years	0.1	0.6	0.3	1.1
	0.4	3.0	1.3	3.4
