For the attention of Richard Rowley

Dear Sir

**Re: Request for Statement of Works received on 31 March 2015
For 201MW of Embedded Generation at Chesterfield Substation
User Agreement Reference No. A/EME/90/5-6EX**

I refer to your **Request for a Statement of Works** in relation to the possible connection of the above embedded generators to your **Distribution System** (the "Project"). The Company started processing this request on 21 April 2015.

We have now undertaken an initial assessment of the significance of the Project and believe the embedded generators included in this bulk submission **do not have a significant impact on the National Electricity Transmission System** (for the avoidance of doubt, such significant impact involves either party in an expenditure of more than £10,000) and would advise you of the following implications:-

- i. Requirement for works on the **National Electricity Transmission System** where such works are not at a **Connection Site**
NO
- ii. Requirement for works to the **National Electricity Transmission System** at a **Connection Site (Grid Supply Point)**
NO
- iii. Necessity for **Site Specific Requirements** (at the site of connection) of the **Embedded Generators**
NO

Any Site Specific Requirements necessary will be confirmed in the Modification Offer.

As this **Statement of Works** does not specify any works as being required nor any **Site Specific Requirements** as being necessary, our letter completes the process required for in respect of your **Request for a Statement of Works** for the purposes of CUSC Paragraph 6.5.1(a)(i).

This **Statement of Works** is made on the basis of and is only valid in respect of the information provided by the **User** in the **Request for a Statement of Works**. If the **User** wishes to make any changes to any information submitted with the **Request for a Statement of Works** a new **Request for Statement of Works** must be submitted to **The Company** before **Energisation** of the connection can take place. Please note, you may not energise the connection of the **Project** without having received a written notification from **The Company** that the process set out in Paragraph 6.5 of CUSC has been complied with in full.

Please note this **Statement of Works** should be forwarded to the **Power Station** as soon as reasonably practicable in accordance with Paragraph 6.5.5.3 of the CUSC.

All communication in relation to this **Statement of Works** should, in the first instance, be directed for the attention of Steph Wootton, who can be contacted by telephone on 01926 656126 or by email at steph.l.wootton@nationalgrid.com

Yours faithfully

PP
