27 August 2015

For the attention of Tony Berndes

Dear Sir

**Re: Bulk Statement of Works Request for Additional Embedded Generation in the South West
Connecting From 1 April 2015 in Two Stages - Stage 1 (602MW) and Stage 2 (879MW)**

I refer to your **Request for a Statement of Works** in relation to the possible connection of the above embedded generators to your **Distribution System** (the "Project"). The Company made an initial response on the 23 July 2015. Following further discussions and submission of additional data by Western Power Distribution (WPD), more detailed studies across all Grid Supply Points within WPD's South West Region have now been completed.

Following more detailed assessment of the significance of the Project and believe the **Embedded Generation** does have a significant impact on the **National Electricity Transmission System** (for the avoidance of doubt, such significant impact involves either party in an expenditure of more than £10,000) and would advise you of the following implications:-

- i. Requirement for works on the **National Electricity Transmission System** where such works are not at a **Connection Site**

YES

For details please see Appendix 1 attached

- ii. Requirement for works to the **National Electricity Transmission System** at a **Connection Site (Grid Supply Point)**

YES

For details please see Appendix 1 attached

iii. Necessity for **Site Specific Requirements** (at the site of connection) of the **Power Station**

YES

For details please see Appendix 1 attached

Any Site Specific Requirements necessary will be confirmed in the Modification Offer.

This **Statement of Works** will remain valid for a period of 90 **Business Days** from the date hereof, i.e. until 6 December 2015 ("**Expiry Date**"). After the **Expiry Date** this **Statement of Works** will lapse.

Should your customer wish to progress the Project, you will need to advise us of this fact by signing and returning to **The Company** the **Confirmation of Progression** form attached hereto by the **Expiry Date**.

Any signed **Confirmation of Progression** (together with the appropriate fee) received by **The Company** by the **Expiry Date**, together with the information included in the **Request for a Statement of Works**, shall be deemed to be **Modification Application** for the purposes of the **Charging Statements** and for Paragraphs 1.3.2, 6.9.2, 6.9.3 and 6.10 of the **CUSC** which shall apply thereto.

Modification Applications (including deemed **Modification Applications**) will only be valid under this process if received by **The Company** on or before the **Expiry Date**. In such event the **Expiry Date** shall not be extended, and this **Statement of Works** will lapse after the **Expiry Date** except where **The Company** agrees in writing that a revised **Statement of Works** is not reasonably required.

This **Statement of Works** has been assessed as at the date of issue. In the event that the system background changes on or before the **Expiry Date** of this **Statement of Works**, or before the **User** has completed, signed and returned the **Confirmation of Project Progression** with the appropriate fee, **The Company** reserves the right to revise any and all aspects of this **Statement of Works** and will notify the **User** of any changes to this **Statement of Works**.

This **Statement of Works** is made on the basis of and is only valid in respect of the information provided by the **User** in the **Request for a Statement of Works**. If the **User** wishes to make any changes to any information submitted with the **Request for a Statement of Works** a new **Request for Statement of Works** must be submitted to **The Company** before **Energisation** of the connection can take place. Please note, you may not energise the connection of the Project without having received a written notification from **The Company** that the process set out in Paragraph 6.5 of **CUSC** has been complied with in full.

Please note this **Statement of Works** should be forwarded to the **Power Station** as soon as reasonably practicable in accordance with Paragraph 6.5.5.3 of the **CUSC**.

All communication in relation to this **Statement of Works** should, in the first instance, be directed for the attention of Steph Wootton, who can be contacted by telephone on 01926 656126 or by email at steph.l.wootton@nationalgrid.com

Yours faithfully

NICOLA MEDALOVA
HEAD OF CUSTOMER SERVICE
