23 September 2015

For the attention of Mr Tony Berndes

Dear Sir

Re: Bulk Request for Statement of Works received on 27 July 2015 for Embedded Generation Connecting to Grid Supply Points in South Wales

I refer to your **Request for a Statement of Works** in relation to the possible connection of the above embedded generation to your **Distribution System** (the "Project"). The Company started processing this request on 26 August 2015.

We have now undertaken an initial assessment of the significance of the Project and believe the **Embedded Generators** do have a significant impact on the **National Electricity Transmission System** (for the avoidance of doubt, such significant impact involves either party in an expenditure of more than £10,000) and would advise you of the following implications:-

- i. Requirement for works on the **National Electricity Transmission System** where such works are not at a **Connection Site**

YES

Please see Appendix 1 attached for details

- ii. Requirement for works to the **National Electricity Transmission System** at a **Connection Site (Grid Supply Point)**

YES

Please see Appendix 1 attached for details

- iii. Necessity for **Site Specific Requirements** (at the site of connection) of the **Power Station**

YES

Please see Appendix 1 attached for details

Any **Site Specific Requirements** necessary will be confirmed in the **Modification Offer**. This **Statement of Works** will remain valid for a period of 90 **Business Days** from the date hereof, i.e. until 1 February 2016 ("**Expiry Date**"). After the **Expiry Date** this **Statement of Works** will lapse.

Should your customer wish to progress the Project, you will need to advise us of this fact by signing and returning to The Company the **Confirmation of Progression** form attached hereto by the **Expiry Date**.

Any signed **Confirmation of Progression** (together with the appropriate fee) received by The Company by the **Expiry Date**, together with the information included in the **Request for a Statement of Works**, shall be deemed to be **Modification Application** for the purposes of the **Charging Statements** and for Paragraphs 1.3.2, 6.9.2, 6.9.3 and 6.10 of the **CUSC** which shall apply thereto.

Modification Applications (including deemed **Modification Applications**) will only be valid under this process if received by The Company on or before the **Expiry Date**. In such event the **Expiry Date** shall not be extended, and this **Statement of Works** will lapse after the **Expiry Date** except where The Company agrees in writing that a revised **Statement of Works** is not reasonably required. This **Statement of Works** has been assessed as at the date of issue. In the event that the system background changes on or before the **Expiry Date** of this **Statement of Works**, or before the User has completed, signed and returned the **Confirmation of Project Progression** with the appropriate fee, The Company reserves the right to revise any and all aspects of this **Statement of Works** and will notify the User of any changes to this **Statement of Works**.

This **Statement of Works** is made on the basis of and is only valid in respect of the information provided by the User in the **Request for a Statement of Works**. If the User wishes to make any changes to any information submitted with the **Request for a Statement of Works** a new **Request for Statement of Works** must be submitted to The Company before **Energisation** of the connection can take place. Please note, you may not energise the connection of the Project without having received a written notification from The Company that the process set out in Paragraph 6.5 of CUSC has been complied with in full.

Please note this **Statement of Works** should be forwarded to the **Power Station** as soon as reasonably practicable in accordance with Paragraph 6.5.5.3 of the CUSC.

All communication in relation to this **Statement of Works** should, in the first instance, be directed for the attention of Steph Wootton, who can be contacted by telephone on 01926 656126 or by email at steph.l.wootton@nationalgrid.com

Yours faithfully

 **NICOLA MEDALOVA**
